

Correction

Viscosities and Densities of Binary Mixtures of Hexane with 1-Chlorohexane between 293.15 K and 333.15 K, Mikhail F. Bolotnikov* and Yuriy A. Neruchev, *J. Chem. Eng. Data* **2003**, *48*, 739–741.

Table 1 in the above reference contained an error. The value of kinematic viscosity for 1-chlorohexane at 298.15 K should be $0.8209 \times 10^{-6} \text{ m}^2 \text{ s}^{-1}$.
