

## ERRATUM

Volume **159**, Number 2 (2000), in the article “An Algorithm for Solving Boundary Value Problems,” by Elias Deeba, S. A. Khuri, and Shishen Xie, pages 125–138 (doi:10.1006/jcph.2000.6452): Equation (4.9) on page 134 is incorrectly printed as

$$u(x) = -2 \log \left[ \cosh \left( \frac{0.5(x - 0.5)\theta}{0.25 \cosh \theta} \right) \right].$$

The expression should be

$$u(x) = -2 \log \left\{ \frac{\cosh[0.5(x - 0.5)\theta]}{\cosh(0.25\theta)} \right\}.$$
