

*Continued from inside back cover*

- 591 **A field-space-based level set method for computing multi-valued solutions to 1D Euler–Poisson equations**  
Hailiang Liu and Zhongming Wang
- 615 **Direct numerical simulations of droplet emulsions in sliding bi-periodic frames using the level-set method**  
See Jo Kim and Wook Ryol Hwang
- 635 **Vorticity-preserving schemes for the compressible Euler equations**  
A. Lerat, F. Falissard, and J. Sidès
- 652 **Sparse grid collocation schemes for stochastic natural convection problems**  
Baskar Ganapathysubramanian and Nicholas Zabaras
- 686 **A Hermite WENO-based limiter for discontinuous Galerkin method on unstructured grids**  
Hong Luo, Joseph D. Baum, and Rainald Löhner
- 714 **Using the method of weighted residuals to compute potentials of mean force**  
Eric C. Cyr and Stephen D. Bond
- 730 **An accurate elasto-plastic frictional tangential force–displacement model for granular-flow simulations: Displacement-driven formulation**  
Xiang Zhang and Loc Vu-Quoc
- 753 **A hybrid-Vlasov model based on the current advance method for the simulation of collisionless magnetized plasma**  
F. Valentini, P. Trávníček, F. Califano, P. Hellinger, and A. Mangeney
- 771 **Weighted distance maps computation on parametric three-dimensional manifolds**  
Alexander M. Bronstein, Michael M. Bronstein, and Ron Kimmel
- 785 **A conservative level set method for two phase flow II**  
Elin Olsson, Gunilla Kreiss, and Sara Zahedi
- 808 **A new algorithm for charge deposition for multiple-grid method for PIC simulations in  $r$ - $z$  cylindrical coordinates**  
Christophe Cornet and Dixon T.K. Kwok
- 829 **Optimization of PIC codes by improved memory management**  
D. Tskhakaya and R. Schneider
- 840 **A robust and accurate approach to computing compressible multiphase flow: Stratified flow model and AUSM<sup>+</sup>-up scheme**  
Chih-Hao Chang and Meng-Sing Liou
- 874 **Boundary conditions for a divergence free velocity–pressure formulation of the Navier–Stokes equations**  
Jan Nordström, Ken Mattsson, and Charles Swanson
- 891 **Incorporating topological derivatives into shape derivatives based level set methods**  
Lin He, Chiu-Yen Kao, and Stanley Osher
- 910 **Development of low dissipative high order filter schemes for multiscale Navier–Stokes/MHD systems**  
H.C. Yee and B. Sjögren
- 935 **Application of the parabolic spline method (PSM) to a multi-dimensional conservative semi-Lagrangian transport scheme (SLICE)**  
M. Zerroukat, N. Wood, and A. Staniforth
- 949 **A stabilized finite element method using a discontinuous level set approach for the computation of bubble dynamics**  
Emilie Marchandise, Philippe Geuzaine, Nicolas Chevaugeon, and Jean-François Remacle
- 975 **A domain decomposition approach for non-conformal couplings between finite and boundary elements for unbounded electromagnetic problems in  $\mathcal{R}^3$**   
Marinos Vouvakis, Kezhong Zhao, Seung-Mo Seo, and Jin-Fa Lee

*(Continued on following page)*

*Continued from preceding page*

- 995 **Optimised boundary compact finite difference schemes for computational aeroacoustics**  
Jae Wook Kim
- 1020 **A stable high-order finite difference scheme for the compressible Navier–Stokes equations, far-field boundary conditions**  
Magnus Svård, Mark H. Carpenter, and Jan Nordström
- 1039 **A consistent approach for the coupling of radiation and hydrodynamics at low Mach number**  
Bruno Dubroca, Mohammed Seaïd, and Ioan Teleaga
- 1066 **A new high-order immersed interface method for solving elliptic equations with imbedded interface of discontinuity**  
Xiaolin Zhong
- 1100 **A transient higher order compact scheme for incompressible viscous flows on geometries beyond rectangular**  
Swapan K. Pandit, Jiten C. Kalita, and D.C. Dalal
- 1125 **A stochastic boundary forcing for dissipative particle dynamics**  
Adrian M. Altenhoff, Jens H. Walther, and Petros Koumoutsakos
- 1137 **An adaptive mesh redistribution method for the incompressible mixture flows using phase-field model**  
Zhijun Tan, K.M. Lim, and B.C. Khoo
- 1159 **A modular particle–continuum numerical method for hypersonic non-equilibrium gas flows**  
T.E. Schwartzenruber, L.C. Scalabrin, and I.D. Boyd
- 1175 **Consistent properties reconstruction on adaptive Cartesian meshes for complex fluids computations**  
Guoping Xia, Ding Li, and Charles L. Merkle
