

*Continued from outside back cover*

- 1385 **Parametric uncertainty analysis of pulse wave propagation in a model of a human arterial network**  
D. Xiu and S.J. Sherwin
- 1408 **A lattice-Boltzmann relaxation scheme for coupled convection–radiation systems**  
M.K. Banda, A. Klar and M. Seaïd
- 1432 **Geometric integration over irregular domains with application to level-set methods**  
C. Min and F. Gibou
- 1444 **The finite-volume time-domain algorithm using least square method in solving Maxwell’s equations**  
Y. Shi and C.-H. Liang
- 1458 **A class of energy stable, high-order finite-difference interface schemes suitable for adaptive mesh refinement of hyperbolic problems**  
R.M.J. Kramer, C. Pantano and D.I. Pullin
- 1485 **Finite-difference immersed boundary method consistent with wall conditions for incompressible turbulent flow simulations**  
T. Ikeno and T. Kajishima
- 1509 **A fully adaptive reaction–diffusion integration scheme with applications to systems biology**  
D.J. Miller and A. Ghosh
- 1532 **A numerical algorithm for MHD of free surface flows at low magnetic Reynolds numbers**  
R. Samulyak, J. Du, J. Glimm and Z. Xu
- 1550 **Towards front-tracking based on conservation in two space dimensions II, tracking discontinuities in capturing fashion**  
D.-k. Mao
- 1589 **Calculation of isotropic turbulence using a pure Lagrangian vortex method**  
R. Yokota, T.K. Sheel and S. Obi
- 1607 **A novel immersed boundary velocity correction–lattice Boltzmann method and its application to simulate flow past a circular cylinder**  
C. Shu, N. Liu and Y.T. Chew
- 1623 **A semiclassical transport model for two-dimensional thin quantum barriers**  
S. Jin and K.A. Novak
- 1645 **A global finite-difference semi-Lagrangian model for the adiabatic primitive equations**  
S.R.M. Barros and C.I. Garcia
- 1668 **A generalized Petviashvili iteration method for scalar and vector Hamiltonian equations with arbitrary form of nonlinearity**  
T.I. Lakoba and J. Yang
- 1693 **A mode elimination technique to improve convergence of iteration methods for finding solitary waves**  
T.I. Lakoba and J. Yang
- 1710 **Three-dimensional boundary detection for particle methods**  
A. Haque and G.A. Dilts
- 1731 **Incompressible smoothed particle hydrodynamics**  
M. Ellero, M. Serrano and P. Español
- 1753 **A sign matrix based scheme for non-homogeneous PDE’s with an analysis of the convergence stagnation phenomenon**  
S. Sahmim, F. Benkhaldoun and F. Alcrudo
- 1784 **Multigrid solution method for the steady RANS equations**  
J. Wackers and B. Koren
