

Continued from outside back cover

- 6184 **A Monte Carlo method for solving unsteady adjoint equations**
Q. Wang, D. Gleich, A. Saberi, N. Etemadi and P. Moin
- 6206 **Computationally fast harmonic balance methods for unsteady aerodynamic predictions of helicopter rotors**
K. Ekici, K.C. Hall and E.H. Dowell
- 6226 **An accelerated monotone iterative method for the quantum-corrected energy transport model**
R.-C. Chen and J.-L. Liu
- 6241 **An efficient algorithm for solving the phase field crystal model**
M. Cheng and J.A. Warren
- 6249 **Implementation of unsteady sampling procedures for the parallel direct simulation Monte Carlo method**
H.M. Cave, K.-C. Tseng, J.-S. Wu, M.C. Jermy, J.-C. Huang and S.P. Krumdieck
- 6272 **Application of the integro-moment method to steady-state two-dimensional rarefied gas flows subject to boundary induced discontinuities**
S. Varoutis, D. Valougeorgis and F. Sharipov
- 6288 **Monotone finite volume schemes for diffusion equations on polygonal meshes**
G. Yuan and Z. Sheng
- 6313 **A quadrature-based third-order moment method for dilute gas-particle flows**
R.O. Fox
- 6351 **A hybrid method to study flow-induced deformation of three-dimensional capsules**
Y. Sui, Y.T. Chew, P. Roy and H.T. Low
- 6372 **On the consistency of the direct forcing method in the fractional step solution of the Navier–Stokes equations**
F. Domenichini
- 6385 **An adaptive ghost fluid finite volume method for compressible gas–water simulations**
C. Wang, H. Tang and T. Liu
