

*Continued from outside back cover*

- 6922 **Consistent boundary conditions for the Yee scheme**  
A.-K. Tornberg and B. Engquist
- 6944 **The XTOR code for nonlinear 3D simulations of MHD instabilities in tokamak plasmas**  
H. Lütjens and J.-F. Luciani
- 6967 **Hall magnetohydrodynamics on block-adaptive grids**  
G. Tóth, Y. Ma and T.I. Gombosi
- 6985 **On sub-linear convergence for linearly degenerate waves in capturing schemes**  
J.W. Banks, T. Aslam and W.J. Rider
- 7003 **Stability and convergence of the method of fundamental solutions for Helmholtz problems on analytic domains**  
A.H. Barnett and T. Betcke
- 7027 **Fluid–structure partitioned procedures based on Robin transmission conditions**  
S. Badia, F. Nobile and C. Vergara
- 7052 **An efficient hybrid MLFMA–FFT solver for the volume integral equation in case of sparse 3D inhomogeneous dielectric scatterers**  
J. De Zaeytijd, I. Bogaert and A. Franchois
