

ELSEVIER

Vol. 227, Issue 22, 20 November 2008

JOURNAL OF
COMPUTATIONAL
PHYSICS

CONTENTS

www.elsevier.com/locate/jcp

Abstracted/indexed in ACM Guide to Computing Literature, Chemical Abstracts, CompuMath Citation Index, Current Contents/Physics / Chemistry & Earth Science, Excerpta Medica, Mathematical Reviews, Research Alert, Science Abstracts, Science Citation Index. Also covered in the abstract and citation database SCOPUS[®]. Full text available on ScienceDirect[®]

SHORT NOTE

- 9293 **Second-order accurate normals from height functions**
P.A. Ferdowsi and M. Bussmann

REGULAR ARTICLES

- 9303 **An immersed-boundary method for flow–structure interaction in biological systems with application to phonation**
H. Luo, R. Mittal, X. Zheng, S.A. Bielałowicz, R.J. Walsh and J.K. Hahn
- 9333 **A quasi-positive family of continuous Darcy-flux finite-volume schemes with full pressure support**
M.G. Edwards and H. Zheng
- 9365 **A finite volume method for the approximation of Maxwell's equations in two space dimensions on arbitrary meshes**
F. Hermeline, S. Layouni and P. Omnes
- 9389 **A gas-kinetic BGK scheme for semiclassical Boltzmann hydrodynamic transport**
Y.-H. Shi and J.Y. Yang
- 9408 **Computing entries of the inverse of a sparse matrix using the FIND algorithm**
S. Li, S. Ahmed, G. Klimeck and E. Darve
- 9428 **Towards a compact high-order method for non-linear hyperbolic systems, II. The Hermite-HLLC scheme**
G. Capdeville
- 9463 **Efficient, automated Monte Carlo methods for radiation transport**
R. Kong, M. Ambrose and J. Spanier
- 9477 **Computing several eigenpairs of Hermitian problems by conjugate gradient iterations**
E.E. Ovtchinnikov
- 9498 **Localized artificial diffusivity scheme for discontinuity capturing on curvilinear meshes**
S. Kawai and S.K. Lele
- 9527 **A class of residual distribution schemes and their relation to relaxation systems**
J.A. Rossmannith
- 9554 **Modeling the magnetic interactions between paramagnetic beads in magnetorheological fluids**
E.E. Keaveny and M.R. Maxey
