

Continued from outside back cover

- 9865 **Simulations of the 2.5D inviscid primitive equations in a limited domain**
Q. Chen, R. Temam and J.J. Tribbia
- 9885 **Mixed Constraint Preconditioners for the iterative solution of FE coupled consolidation equations**
L. Bergamaschi, M. Ferronato and G. Gambolati
- 9898 **Novel electromagnetic surface integral equations for highly accurate computations of dielectric bodies with arbitrarily low contrasts**
Ö. Ergül and L. Gürel
- 9913 **Application of the fast multipole method for the evaluation of magnetostatic fields in micromagnetic computations**
B. Van de Wiele, F. Olyslager and L. Dupré
- 9933 **A Schwarz generalized eigen-oscillation spectral element method (GeSEM) for 2-D high frequency electromagnetic scattering in dispersive inhomogeneous media**
W. Cai, X. Ji, J. Sun and S. Shao
- 9955 **An immersed interface method for solving incompressible viscous flows with piecewise constant viscosity across a moving elastic membrane**
Z. Tan, D.V. Le, Z. Li, K.M. Lim and B.C. Khoo
