

*Continued from outside back cover*

- 8394 **Numerical analysis of the Burgers' equation in the presence of uncertainty**  
P. Pettersson, G. Iaccarino and J. Nordström
- 8413 **Krylov iterative methods and synthetic acceleration for transport in binary statistical media**  
E.D. Fichtl, J.S. Warsa and A.K. Prinja
- 8427 **An implicit immersed boundary method for three-dimensional fluid–membrane interactions**  
D.V. Le, J. White, J. Peraire, K.M. Lim and B.C. Khoo
- 8446 **Numerical simulation of three-dimensional nonlinear water waves**  
L. Xu and P. Guyenne
- 8467 **Local stress calculation in simulations of multicomponent systems**  
P.S. Branicio and D.J. Srolovitz
