

Continued from outside back cover

- 2859 **A coupled arbitrary Lagrangian–Eulerian and Lagrangian method for computation of free surface flows with insoluble surfactants**
S. Ganesan and L. Tobiska
- 2874 **On the time-splitting scheme used in the Princeton Ocean Model**
V.M. Kamenkovich and D.A. Nechaev
- 2906 **Trim-to-Coherence Fourier Transform**
M. Böhm, M. Tasche, B. Seifert and F. Mitschke
- 2918 **The influence of cell geometry on the accuracy of upwind schemes in the low mach number regime**
F. Rieper and G. Bader
- 2934 **Conservative discretization of Coriolis force in a finite volume framework**
E. Audusse, R. Klein and A. Owinoh
- 2951 **Eulerian Gaussian beams for Schrödinger equations in the semi-classical regime**
S. Leung and J. Qian
- 2978 **An efficient moving mesh spectral method for the phase-field model of two-phase flows**
J. Shen and X. Yang
- 2993 **A grid based particle method for moving interface problems**
S. Leung and H. Zhao
- 3025 **Third-order Energy Stable WENO scheme**
N.K. Yamaleev and M.H. Carpenter
- 3048 **A new combined stable and dispersion relation preserving compact scheme for non-periodic problems**
T.K. Sengupta, V. Lakshmanan and V.V.S.N. Vijay
- 3072 **Second-order time evolution of P_N equations for radiation transport**
G.L. Olson
- 3084 **An adaptive hierarchical sparse grid collocation algorithm for the solution of stochastic differential equations**
X. Ma and N. Zabarao
- 3114 **Phase reduction models for improving the accuracy of the finite element solution of time-harmonic scattering problems I: General approach and low-order models**
X. Antoine and C. Geuzaine
- 3137 **Matrix approach to discrete fractional calculus II: Partial fractional differential equations**
I. Podlubny, A. Chechkin, T. Skovranek, Y. Chen and B.M. Vinagre Jara
- 3154 **Remapping-free ALE-type kinetic method for flow computations**
G. Ni, S. Jiang and K. Xu
