

*Continued from outside back cover*

- 1621 **Approximating time evolution related to Ginzburg–Landau functionals via Sobolev gradient methods in a finite-element setting**  
N. Raza, S. Sial and S. Siddiqi
- 1626 **Generalized reference fields and source interpolation for the difference formulation of radiation transport**  
T. Luu, E.D. Brooks III and A. Szőke
- 1643 **A conservative scheme for the relativistic Vlasov–Maxwell system**  
A. Suzuki and T. Shigeyama
- 1661 **An *h*-adaptive mesh method for Boltzmann–BGK/hydrodynamics coupling**  
Z. Cai and R. Li
- 1681 **A robust high-order residual distribution type scheme for steady Euler equations on unstructured grids**  
G. Hu, R. Li and T. Tang
- 1698 **Artificial compressibility method revisited: Asymptotic numerical method for incompressible Navier–Stokes equations**  
T. Ohwada and P. Asinari
- 1724 **On projected Newton–Krylov solvers for instationary laminar reacting gas flows**  
S. van Veldhuizen, C. Vuik and C.R. Kleijn
- 1739 **Assessment of localized artificial diffusivity scheme for large-eddy simulation of compressible turbulent flows**  
S. Kawai, S.K. Shankar and S.K. Lele
- 1763 **Runge–Kutta methods with minimum storage implementations**  
D.I. Ketcheson
- 1774 **A global shallow water model using high order multi-moment constrained finite volume method and icosahedral grid**  
S. Ii and F. Xiao
- 1797 **A numerical method for the study of nucleation of ordered phases**  
L. Lin, X. Cheng, Weinan E, A.-C. Shi and P. Zhang
- 1810 **Shock capturing with PDE-based artificial viscosity for DGFEM: Part I. Formulation**  
G.E. Barter and D.L. Darmofal
- 1828 **A numerical source of small-scale number-density fluctuations in Eulerian–Lagrangian simulations of multiphase flows**  
Y. Ling, A. Haselbacher and S. Balachandar
- 1852 **Weak second-order splitting schemes for Lagrangian Monte Carlo particle methods for the composition PDF/FDF transport equations**  
H. Wang, P.P. Popov and S.B. Pope
- 1879 **Nonreflecting boundary conditions for discrete waves**  
A. Carpio and B. Tajiador
- 1897 **Application of the RBF meshless method to the solution of the radiative transport equation**  
M. Kindelan, F. Bernal, P. González-Rodríguez and M. Moscoso
- 1909 **A conservative SPH method for surfactant dynamics**  
S. Adami, X.Y. Hu and N.A. Adams
