Announcement

International Conference on	International Conference on
Numerical Methods	Numerical Methods
in	in
Thermal Problems	Laminar & Turbulent Flow
July 7–10, 1981	July 13–16, 1981

Both to be held in Venice, Italy

Following on from the first conferences held in Swansea, these conferences will be held with the view of consolidating the recent advances in the application of numerical techniques, particularly finite-difference and finite-element methods, to the solution of thermal and fluids problems.

Authors are requested to submit papers to the appropriate conference using the general guide: Thermal Problems—emphasis on heat transfer, Laminar and Turbulent Flow—mass transfer.

Call for Papers

Abstracts are invited on the topics outlined in the provisional program overleaf. Other papers of merit in related topics will also be considered for inclusion. The abstracts should be approximately 300 words in length and submitted before September 1, 1980. Final papers will be required by February 1, 1981 for inclusion in the appropriate Conference Proceedings.

All abstracts for both conferences should be sent to:

Dr. C. Taylor
Department of Civil Engineering
