The purpose of this journal is to report original investigations on the synthesis, structure, and the physical and chemical properties of coordination compounds of metals. It will deal primarily with basic phenomena such as equilibria, kinetics, mechanisms and catalytic effects. Its scope can be defined as involving the interactions of organic and inorganic ligands with metals. Material on applications of coordination compounds may also be included in papers when relevant to the main theme.

SUBSCRIPTION RATES

Each volume consists of four issues

In Great Britain

Individuals who warrant the journal is for their own personal use, and order direct from the publisher, per volume, postpaid: £5·50. Libraries, research institutions and others, per volume, postpaid: £11·55.

Outside Great Britain

Individuals who warrant the journal is for their own personal use, and order direct from the publisher, per volume, postpaid: \$14.50/£6·00. Libraries, research institutions and others, per volume, postpaid: \$32.00/£13·35.

Individuals and organizations entering a 3-volume subscription to *Journal of Coordination Chemistry* during the journal's first volume will qualify as 3-Volume Charter Subscribers and will receive a special discount of 33½% if payment is made for all 3 volumes and 25% if payment is made on a per-volume basis.

Subscriptions may be sent to Gordon and Breach Science Publishers Ltd., 12 Bloomsbury Way, London WC1, England or to Gordon and Breach, Science Publishers, Inc., 440 Park Avenue South, New York, N.Y. 10016, U.S.A.
