Vagg (Australia)

**Aims and Scope.** Part B will publish review articles in all areas of coordination chemistry, including inorganic solid state chemistry, organometallic chemistry and bioinorganic chemistry, as well as applications to analytical chemistry, catalysis, industrial chemistry and materials science. Articles may focus primarily on the metal, the ligand or the application. Given the limitation in length for the reviews, two extreme cases can be envisaged. Topics of emerging interest should be developed fully from the basics forward. Careful attention must be paid to the way in which the new area relates to the field in general. Reviews of well-established subjects should collect the developments from the literature and take a critical view of recent activities.

**Subscription Rates:** Base list subscription price per volume: ECU251 (US\$236; Dfl584). \* Available only to single users whose library already subscribes to the journal OR who warrant that the journal is for their own use and provide a home address for mailing. Orders must be sent directly to STBS and payment must be made by personal check or credit card.

Separate rates exist for different users such as academic and corporate institutions. These rates may also include photocopy license and postage and handling charges. Special discounts are also available to continuing subscribers through our Subscriber Incentive Plan (SIP).

\*The European Currency Unit (ECU) is the worldwide base list currency rate; payment can be made by draft drawn on ECU currency in the amount shown. Alternatively, the US Dollar rate applies only to North American subscribers; the Dutch Guilder rate applies only to UK and Mainland European subscribers. Subscribers from other territories should contact their agent or one of the STBS Subscription Departments:
