Aims and Scope

The Journal of Coordination Chemistry publishes the results of original investigations involving the physical and chemical properties, syntheses and structures of coordination compounds. Its scope may be defined as being concerned with the interactions of organic and inorganic ligands with metallic elements. Material on applications of coordination compounds may be included when relevant from time to time. In addition to full articles, preliminary communications or results (up to 1000 words) may be submitted. The journal intends to shorten considerably the time between receipt, acceptance and publication of such articles in order to provide a mechanism for speedy publication of preliminary accounts of original and significantly interesting findings in coordination chemistry. Short articles that lack urgency are also acceptable to the journal and will be published in due course, as long as the desire to avoid multiple publication is met.

The editors also welcome review articles in all areas of coordination chemistry, including inorganic solid state chemistry, organometallic chemistry and bioinorganic chemistry, as well as applications to analytical chemistry, catalysis, industrial chemistry and materials science. Articles may focus primarily on the metal, the ligand or the application. Given the limitation in length for the reviews, two extreme cases can be envisaged. Topic of emerging interest should be developed fully from basics. Careful attention must be paid to the way in which the new area relates to the field in general. Reviews of well-established subjects should collect developments from the literature and take a critical view of recent activities. Books for review should be sent to the Editors, at the addresses above, and not the publisher.

Notes for contributors can be found at the back of the journal.

Voluntary Page Charges

The United States National Science Foundation has extended the allowance of page charge funds for payment to journals regardless of the Publisher's commercial status. Previously this was reserved for only nonprofit society-sponsored journals. Voluntary page charge payments are now accepted for this journal, and authors may elect to pay any amount up to a maximum of \$25.00 per page. Payments will be refunded in the form of a voucher at 100% value of total payment. This voucher can be used by the author or the author's university library for any product or service offered by the Publisher, and thereby can be used to supplement library funding.

Article Vouchers

The principal author of each will receive a voucher for his contribution in the amount of ECU 15.00 (US \$20.00. Yen 3,000) which can also be used to purchase the Publisher's products directly or through university libraries, thereby reducing costs of publications to those authors supporting the journal.

This journal is sold CIF with title passing to the purchaser at the point of shipment in accordance with the laws of The Netherlands. All claims should be made to your agent or the publisher.
