FOREWORD

This Special Issue of the *Journal of Coordination Chemistry* contains a number of fully refereed papers exclusively from authors resident in Latin America. The papers are the result of personal invitations extended by the Guest Editors to the authors, chosen on the basis of their previous publications in the chemical literature. These resulting papers thus represent the many advances in research activities and areas that are currently developing in this part of the world.

The Guest Editors wish to express their gratitude for the opportunity provided by *Journal of Coordination Chemistry* and *Gordon and Breach* to put together this Special Issue, and we hope that these contributions will enhance the interest of other Latin American academics to publish their results in such journals.

Guest Editors
B. Kharissov, *Mexico*
J. Costamagna, *Chile*
