

INDEX

- Bark, F. H. & Sundström, O.** A note on rotating Hele Shaw cells, 271–281
- Battjes, J. A. & Sakai, T.** Velocity field in a steady breaker, 421–437
- Blake, J. R. & Gibson, D. C.** Growth and collapse of a vapour cavity near a free surface, 123–140
- Boyer, D. L.** Two-layer rotating steady viscous flow over long ridges, 1–14
- Brenner, H.** The translational and rotational motions of an n -dimensional hypersphere through a viscous fluid at small Reynolds numbers, 197–215
- Chandran, K. B. & Yearwood, T. L.** Experimental study of physiological pulsatile flow in a curved tube, 59–85
- El Telbany, M. M. M. & Reynolds, A. J.** Turbulence in plane channel flows, 283–318
- Fernholz, H. H. & Vagt, J.-D.** Turbulence measurements in an adverse-pressure-gradient three-dimensional turbulent boundary layer along a circular cylinder, 233–269
- Foda, M. A. & Mei, C. C.** Nonlinear excitation of long-trapped waves by a group of short swells, 319–345
- Gibson, D. C.** *See* Blake & Gibson
- Hosking, R. J.** *See* Sivakumaran, Hosking & Tingsanchali
- Hussain, A. K. M. F.** *See* Kleis, Hussain & Sokolov
- Jackson, P. S.** On the displacement height in the logarithmic velocity, 15–25
- Josberger, E. G. & Martin, S.** A laboratory and theoretical study of the boundary layer adjacent to a vertical melting ice wall in salt water, 439–473
- Kleis, S. J., Hussain, A. K. M. F. & Sokolov, M.** A ‘turbulent spot’ in an axisymmetric free shear layer. Part 3. Azimuthal structure and initiation mechanism, 87–106
- Koop, C. G. & Redekopp, L. G.** The interaction of long and short internal gravity waves: theory and experiment, 367–409
- Lauder, B. E.** *See* Newman, Launder & Lumley
- Lumley, J. L.** *See* Newman, Launder & Lumley
- Lundgren, T. S.** Turbulent pair dispersion and scalar diffusion, 27–57
- McKibbin, R. & O’Sullivan, M. J.** Heat transfer in a layered porous medium heated from below, 141–173
- Martin, S.** *See* Josberger & Martin
- Mei, C. C.** *See* Foda & Mei
- Newman, G. R., Launder, B. E. & Lumley, J. L.** Modelling the behaviour of homogeneous scalar turbulence, 217–232
- O’Sullivan, M. J.** *See* McKibbin & O’Sullivan
- Redekopp, L. G.** *See* Koop & Redekopp
- Reynolds, A. J.** *See* El Telbany & Reynolds
- Sakai, T.** *See* Battjes & Sakai
- Schwartz, L. W.** A semi-analytic approach to the self-induced motion of vortex sheets, 475–490
- Sherwood, J. D.** The primary electroviscous effect in a suspension of rods, 347–366
- Sivakumaran, N. S., Hosking, R. J. & Tingsanchali, T.** Steady shallow flow over a spillway, 411–420
- Smith, R.** The early stages of contaminant dispersion in shear flows, 107–122
- Sokolov, M.** *See* Kleis, Hussain & Sokolov
- Srokosz, M. A.** A note on particle trajectories in the highest wave, 491–495
- Sundström, O.** *See* Bark & Sundström
- Tingsanchali, T.** *See* Sivakumaran, Hosking & Tingsanchali

Vagt, J.-D. *See* Fernholz & Vagt

Yearwood, T. L. *See* Chandran & Yearwood

REVIEWS

Practical Experiences with Flow-Induced Vibrations; Proceedings of LAHR/IUTAM Symposium, edited by E. Naudascher and D. Rockwell; Wind Engineering; Proceedings of the Fifth International Conference on Wind Engineering, edited by J. E. Cermak, 496-497
