

## CORRIGENDUM

A numerical and experimental investigation of the  
stability of spiral Poiseuille flow

By DONALD I. TAKEUCHI AND DANIEL F. JANKOWSKI  
*Journal of Fluid Mechanics*, vol. 102, 1981, pp. 101–126.

Owing to an error in equation (16), the *calculations* of  $\psi_L$  (figure 6) and  $n_c$  (table 4) are incorrect. Equation (16) should be

$$n_c = \frac{2\pi b}{s} \tan \psi_c. \quad (16)$$

Corrected versions of figure 6 and table 4 are available from the authors or the editorial office of the *Journal of Fluid Mechanics*. The use of the new values improves the agreement between  $\psi_L$  and  $\psi_c$ , particularly for  $\mu = 0$ . In addition, the definition of  $\alpha_c$  in terms of  $s$  should read  $\alpha_c = 2\pi(b-a)/s$ . This oversight does not influence any results or conclusions in the paper. We are indebted to Professor B. S. Ng for bringing these items to our attention.
