

## INDEX

- Badr, H., Dennis, S. C. R., Bates, S. & Smith, F. T.** Numerical and asymptotic solutions for merging flow through a channel with an upstream splitter plate, 63–81
- Barrie, D.** *See* Martin & Barrie
- Bates, S.** *See* Badr, Dennis, Bates & Smith
- Bogard, D. G.** *See* Tiederman, Luchik & Bogard
- Brown, S. N.** *See* Stewartson & Brown
- Capell, K.** *See* Stewartson & Capell
- Chahine, G. L. & Liu, H. L.** A singular-perturbation theory of the growth of a bubble cluster in a superheated liquid, 257–279
- Cowley, S. J. & Smith, F. T.** On the stability of Poiseuille–Couette flow: a bifurcation from infinity, 83–100
- Dabroś, T.** A singularity method for calculating hydrodynamic forces and particle velocities in low-Reynolds-number flows, 1–21
- Demetriades, A. & McCullough, G.** Mean-flow measurements in a supersonic three-dimensional turbulent boundary layer, 401–418
- Dennis, S. C. R.** *See* Badr, Dennis, Bates & Smith
- Deutsch, S.** *See* Madavan, Deutsch & Merkle
- Gaffet, B.** On generalized vorticity-conservation laws, 141–149
- Gerrard, J. H.** An experimental test of the theory of waves in fluid-filled deformable tubes, 321–347
- Grundy, R. E. & Rottman, J. W.** The approach to self-similarity of the solutions of the shallow-water equations representing gravity-current releases, 39–53
- Holyer, J. Y.** The stability of long steady three-dimensional salt fingers to long-wavelength perturbations, 495–503
- Joos, F. M. & Snaddon, R. W. L.** Electrostatically enhanced film condensation, 23–28
- Kaykayoglu, R. & Rockwell, D.** Vortices incident upon a leading edge: instantaneous pressure fields, 439–461
- Koenig, K. & Roshko, A.** An experimental study of geometrical effects on the drag and flow field of two bluff bodies separated by a gap, 167–204
- Kuang, Y.** *See* Weinbaum, Lawrence & Kuang
- Kuang, Y.** *See* Lawrence, Kuang & Weinbaum
- Kurzweg, U. H.** Enhanced heat conduction in oscillating viscous flows within parallel-plate channels, 291–300
- Lawrence, C. J.** *See* Weinbaum, Lawrence & Kuang
- Lawrence, C. J., Kuang, Y. & Weinbaum, S.** The inertial draining of a thin fluid layer between parallel plates with a constant normal force. Part 2. Boundary layer and exact numerical solutions, 479–494
- Leitch, A. M.** *See* Worster & Leitch
- Liu, H. L.** *See* Chahine & Liu
- Luchik, T. S.** *See* Tiederman, Luchik & Bogard

- Madavan, N. K., Deutsch, S. & Merkle, C. L.** Measurements of local skin friction in a microbubble-modified turbulent boundary layer, 237–256
- Martin, J. & Barrie, D.** Diffraction by a slender ship: uniform theory for head and oblique seas, 349–367
- McCullough, G.** *See* Demetriades & McCullough
- Merkle, C. L.** *See* Madavan, Deutsch & Merkle
- Monkewitz, P. A.** The response of Helmholtz resonators to external excitation. Part 2. Arrays of slit resonators, 151–166
- Page, M. A.** On the low-Rossby-number flow of a rotating fluid past a circular cylinder, 205–221
- Phillips, O. M.** Spectral and statistical properties of the equilibrium range in wind-generated gravity waves, 505–531
- Rockwell, D.** *See* Kaykayoglu & Rockwell
- Roshko, A.** *See* Koenig & Roshko
- Rottman, J. W.** *See* Grundy & Rottman
- Sanz, A.** The influence of the outer bath in the dynamics of axisymmetric liquid bridges, 101–140
- Smith, F. T.** *See* Badr, Dennis, Bates & Smith
- Smith, F. T.** *See* Cowley & Smith
- Snaddon, R. W. L.** *See* Joos & Snaddon
- Sneyd, A. D.** Stability of fluid layers carrying a normal electric current, 223–236
- Speziale, C. G.** Galilean invariance of subgrid-scale stress models in the large-eddy simulation of turbulence, 55–62
- Stewartson, K. & Capell, K.** On the stability of ring modes in a trailing line vortex: the upper neutral points, 369–386
- Stewartson, K. & Brown, S. N.** Near-neutral centre-modes as inviscid perturbations to a trailing line vortex, 387–399
- Tanaka, M.** The stability of steep gravity waves. Part 2, 281–289
- Tiederman, W. G., Luchik, T. S. & Bogard, D. G.** Wall-layer structure and drag reduction, 419–437
- Weinbaum, S., Lawrence, C. J. & Kuang, Y.** The inertial draining of a thin fluid layer between parallel plates with a constant normal force. Part 1. Analytic solutions; inviscid and small- but finite-Reynolds-number limits, 463–477
- Weinbaum, S.** *See* Lawrence, Kuang & Weinbaum
- Worster, M. G. & Leitch, A. M.** Laminar free convection in confined regions, 301–319
