

## CORRIGENDUM

The interaction of waves with arrays of vertical circular cylinders

By C. M. LINTON AND D. V. EVANS

*Journal of Fluid Mechanics*, vol. 215 (1990), pp. 549–569

The curves shown in figure 2 are inaccurate owing to insufficient points being used to represent them. In particular the curves fail to show the large peak that occurs around  $\kappa a = 1.6$ . A corrected version of this figure is shown below. We are indebted to Dr Paul Sclavounos for bringing this inaccuracy to our attention.

FIGURE C1. Non-dimensional amplitude of the first-order force in the direction of wave advance plotted against  $\kappa a$  for a group of four cylinders situated at the vertices of a square ( $a/h = \frac{1}{2}$ ,  $R/h = 2$ ,  $\beta = \frac{1}{4}\pi$ ).
