NOTES FOR AUTHORS

Authors wishing to have papers published in the *Journal* should send them to any editor, choosing one in their own or a neighbouring country where possible. The submission of three copies will expedite assessment, although it may not be possible to return all these copies. Original drawings should not be sent until the paper is accepted. The initial submission will be acknowledged by postcard but not subsequent communications. Submission of a paper implies a declaration by the author that the work is not being considered for publication elsewhere and that it has not already been considered by a different editor of the *Journal*. Reports on conferences must be submitted within three months of the meeting.

Authors are urged to write their papers clearly and attractively, so that their work will be readily accessible to readers. Manuscripts should be typed in double spacing on one side of the paper only, with references listed at the end in alphabetical order of authors. Drawings should be in black Indian ink or from a high-quality laser printer, and should not be larger than 30 cm by 45 cm. Lettering to be inserted by the printer should be shown clearly on copies of the figures, rather than on the original drawings. A typed list of captions should be provided at the end of the manuscript. Extensive detailed mathematical relations, tables or figures likely to be useful only to a few specialists may be held in the editorial files, with copies being made available to readers on request.

There is no charge for publication, although the cost of any colour figures (£500 per page) must be borne by authors. An author is entitled to 50 offprints of the paper free of charge, and additional offprints can be purchased if ordered when proofs are returned.

ELECTRONIC SUBMISSION OF PAPERS

(in finally accepted form only)

Papers accepted for publication in the *Journal* can be printed directly from author-prepared electronic files in LaTeX using a JFM style macro, and authors are strongly encouraged to use this option. The style file (JFM.sty) together with a guide to its use (JFMguide.tex), sample pages (JFMsampl.tex) and a guide to editorial style and notation (JFMnot.tex) are available as follows:

- via anonymous ftp from the Cambridge University Press at ftp.cup.cam.ac.uk; the files are concatenated in the single file jfm.all in the directory /pub/texarchive/journals/latex;
- on a pc or Mackintosh disk from the JFM Editorial Office, Dept of Applied Mathematics & Theoretical Physics, Silver Street, Cambridge CB3 9EW, UK.

These files will be updated periodically: please make sure that you have the latest version. While use of the JFM LaTeX style file is preferred, ordinary LaTeX or plain TeX files can also be accepted.

When the paper has been accepted for publication, and only then, a hard copy of the final version, including the figures, should be sent to the Editor handling the paper; the identical TeX file can either accompany this hard copy on a pc or Macintosh disk or be sent by email to the Editorial Assistant at the address given above.

Note that papers must be suitably prepared, adhering closely to JFM editorial requirements for notation, English and presentation. Any editorial changes will be made by the printer and if these are numerous it may be more efficient to set the paper conventionally.

If you have any questions or comments please contact the JFM Editorial Office at the above address or at jfm@damtp.cam.ac.uk.
