Basaran, O. A. *See* Zhang, Padgett & Basaran

Bazhlekov, I. B. & Chesters, A. K. Numerical investigation of the dynamic influence of the contact line region on the macroscopic meniscus shape, 137–146

Carlson, H. A. & Lumley, J. L. Active control in the turbulent wall layer of a minimal flow unit, 341–371

Chesters, A. K. *See* Bazhlekov & Chesters

Coward, A. V. & Hall, P. The stability of two-phase flow over a swept wing, 247–273

Dauby, P. C. & Lebon, G. Bénard–Marangoni instability in rigid rectangular containers, 25–64

Dimas, A. A. *See* Duncan & Dimas

Duin, C. A. van Rapid-distortion turbulence models in the theory of surface-wave generation, 147–153

Duncan, J. H. & Dimas, A. A. Surface ripples due to steady breaking waves, 309–339

Hall, P. *See* Coward & Hall

Higuera, F. J. & Liñán, A. Flow field of a diffusion flame attached to a thick-walled injector between two coflowing reactant streams, 389–411

Howe, M. S. Emendation of the Brown & Michael equation, with application to sound generation by vortex motion near a half-plane, 89–101

Huang, Z. & Keffer, J. F. Development of structure within the turbulent wake of a porous body. Part 1. The initial formation region, 103–115

Huang, Z., Kawall, J. G. & Keffer, J. F. Development of structure within the turbulent wake of a porous body. Part 2. Evolution of the three-dimensional features, 117–136

Hyun, J. M. *See* Kwak & Hyun

Ilin, K. I. *See* Vladimirov, Moffatt & Ilin

Ishigaki, H. Laminar flow in rotating curved pipes, 373–388

Jahanmiri, M., Prabhu, A. & Narasimha, R. Experimental studies of a distorted turbulent spot in a three-dimensional flow, 1–24

Jiang, L., Ting, C.-L., Perlin, M. & Schultz, W. W. Moderate and steep Faraday waves: instabilities, modulation and temporal asymmetries, 275–307

Kawall, J. G. *See* Huang, Kawall & Keffer

Kaye, S. R. *See* Phillips & Kaye

Keffer, J. F. *See* Huang, Kawall & Keffer; Huang & Keffer

Kwak, H. S. & Hyun, J. M. Natural convection in an enclosure having a vertical sidewall with time-varying temperature, 65–88

Lebon, G. *See* Dauby & Lebon

Liñán, A. *See* Higuera & Liñán

Lumley, J. L. *See* Carlson & Lumley

Mackaplow, M. B. & Shaqfeh, E. S. G. A numerical study of the rheological properties of suspensions of rigid, non-Brownian fibres, 155–186

Moffatt, H. K. *See* Vladimirov, Moffatt & Ilin

Narasimha, R. *See* Jahanmiri, Prabhu & Narasimha

Padgett, R. S. *See* Zhang, Padgett & Basaran

Perlin, M. *See* Jiang, Ting, Perlin & Schultz

Phillips, C. G. & Kaye, S. R. A uniformly asymptotic approximation for the development of shear dispersion, 413–443

Prabhu, A. *See* Jahanmiri, Prabhu & Narasimha

Schultz, W. W. *See* Jiang, Ting, Perlin & Schultz

Shaqfeh, E. S. G. *See* Mackaplow & Shaqfeh

Ting, C.-L. *See* Jiang, Ting, Perlin & Schultz

Vladimirov, V. A., Moffatt, H. K. & Ilin, K. I. On general transformations and variational principles for the magnetohydrodynamics of ideal fluids. Part 2. Stability criteria for two-dimensional flows, 187–205

Zhang, X., Padgett, R. S. & Basaran, O. A. Nonlinear deformation and breakup of stretching liquid bridges, 207–245
