

VOLUME 22 2006

PAÏDOUSSIS, M.P., Foreword	1
POTTEBAUM, T. AND MACMYNOWSKI, D.G., Buffeting of large telescopes: Wind-tunnel measurements of the flow inside a generic enclosure	3
ROSE, S.E., MOODY, C.B., JAMES, D.L. AND BARHORST, A.A., Drag measurement and dynamic simulation of Martian wind-driven sensor platform concepts	21
ATTAR, P.J. AND GORDNIER, R.E., Aeroelastic prediction of the limit cycle oscillations of a cropped delta wing	45
RELVAS, A. AND SULEMAN, A., Fluid–structure interaction modelling of nonlinear aeroelastic structures using the finite element corotational theory	59
METCALF, B., LONGO, J., GHOSH, S. AND STERN, F., Unsteady free-surface wave-induced boundary-layer separation for a surface-piercing NACA 0024 foil: Towing tank experiments	77
WU, G.X., Numerical simulation of water entry of twin wedges	99
BAARHOLM, G.S., LARSEN, C.M. AND LIE, H., On fatigue damage accumulation from in-line and cross-flow vortex-induced vibrations on risers	109
MI, J., NATHAN, G.J. AND WONG, C.Y., The influence of inlet flow condition on the frequency of self-excited jet precession	129
BERGANT, A., SIMPSON, A.R. AND TIJSSELING, A.S., Water hammer with column separation: A historical review	135
NIKOLIĆ, M. AND RAJKOVIĆ, M., Bifurcations in nonlinear models of fluid-conveying pipes supported at both ends	173
MARCOLLO, H. AND HINWOOD, J.B., On shear flow single mode lock-in with both cross-flow and in-line lock-in mechanisms	197
CIGADA, A., MALAVASI, S. AND VANALI, M., Effects of an asymmetrical confined flow on a rectangular cylinder	213
MACDONALD, J.H.G. AND LAROSE, G.L., A unified approach to aerodynamic damping and drag/lift instabilities, and its application to dry inclined cable galloping	229
VAIDYA, A., Observations on the transient nature of shape-tilting bodies sedimenting in polymeric liquids	253
IEMMA, U. AND GENNARETTI, M., A boundary-field integral equation for analysis of cavity acoustic spectrum	261

LEE, U. AND PARK, J., Spectral element modelling and analysis of a pipeline conveying internal unsteady fluid	273
Conference Announcements	293
XU, Y.L. AND DING, Q.S., Interaction of railway vehicles with track in cross-winds . . .	295
XIA, J.Y., LEUNG, D.Y.C. AND HUSSAINI, M.Y., Numerical simulations of flow-field interactions between moving and stationary objects in idealized street canyon settings	315
PONTA, F.L. AND AREF, H., Numerical experiments on vortex shedding from an oscillating cylinder	327
KUMAR, R.A. AND GOWDA, B.H.L., Flow-induced vibration of a square cylinder without and with interference	345
WU, G.X. AND HU, Z.Z., Numerical simulation of viscous flow around unrestrained cylinders	371
HÉMON, P., DE LANGRE, E. AND SCHMID, P., Experimental evidence of transient growth of energy before airfoil flutter	391
MIAO, J.-M. AND HO, M.-H., Effect of flexure on aerodynamic propulsive efficiency of flapping flexible airfoil	401
LIVAOĞLU, R. AND DOĞANGÜN, A., Simplified seismic analysis procedures for elevated tanks considering fluid–structure–soil interaction	421
WANG, C.Z. AND WU, G.X., An unstructured-mesh-based finite element simulation of wave interactions with non-wall-sided bodies	441
MAVRAKOS, S.A. AND CHATJIGEORGIOU, I.K., Second-order diffraction by a bottom-seated compound cylinder	463
KOROBKIN, A., GUÉRET, R. AND MALENICA, Š, Hydroelastic coupling of beam finite element model with Wagner theory of water impact	493
DIETZ, G., SCHEWE, G. AND MAI, H., Amplification and amplitude limitation of heave/pitch limit-cycle oscillations close to the transonic dip	505
ZIAEI-RAD, S. AND ZIAEI-RAD, M., Inverse design of supersonic diffuser with flexible walls using a Genetic Algorithm	529
KANG, S., Uniform-shear flow over a circular cylinder at low Reynolds numbers	541
LIE, H. AND KAASEN, K.E., Modal analysis of measurements from a large-scale VIV model test of a riser in linearly sheared flow	557

KUBENKO, V.D. AND DZYUBA, V.V., Resonance phenomena in cylindrical shell with a spherical inclusion in the presence of an internal compressible liquid and an external elastic medium	577
KARAGIOZIS, K.N., PAÏDOUSSIS, M.P., MISRA, A.K. AND GRINEVICH, E., Addendum to “An experimental study of the nonlinear dynamics of cylindrical shells with clamped ends subjected to axial flow”	595
MODARRES-SADEGHI, Y., PAÏDOUSSIS, M.P. AND SEMLER, C., Addendum to “A nonlinear model for an extensible slender flexible cylinder subjected to axial flow”	597
HAMADICHE, M. AND ABOU-SHADY, H., Optical fiber instability during coating process	599
LANGTHJEM, M.A., MORITA, H., NAKAMURA, T. AND NAKANO, M., A flexible rod in annular leakage flow: Influence of turbulence and equilibrium offset, and analysis of instability mechanisms	617
CHANG, Y.C. AND KEH, H.J., Slow motion of a slip spherical particle perpendicular to two plane walls	647
SRIRAM, V., SANNASIRAJ, S.A. AND SUNDAR, V., Simulation of 2-D nonlinear waves using finite element method with cubic spline approximation	663
HABING, R.A. AND PETERS, M.C.A.M., An experimental method for validating compressor valve vibration theory	683
RODRIGUEZ, C.G., EGUSQUIZA, E., ESCALER, X., LIANG, Q.W. AND AVELLAN, F., Experimental investigation of added mass effects on a Francis turbine runner in still water	699
MINIKES, A. AND BUCHER, I., Comparing numerical and analytical solutions for squeeze-film levitation force	713
PAÏDOUSSIS, M.P., Wave propagation in physiological collapsible tubes and a proposal for a Shapiro number	721
ACKROYD, J. AND BEARMAN, P., Dedication of Proceedings to Dr Jack Gerrard 31.12.1928–21.05.2005	727
Fourth Conference on Bluff Body Wakes and Vortex-Induced Vibrations (BBVIV-4)	729
Acknowledgements	731
LEWEKE, T. AND WILLIAMSON, C.H.K., Preface	733
List of all conference presentations	737
PAÏDOUSSIS, M.P., Real-life experiences with flow-induced vibration	741

BRAZA, M., PERRIN, R. AND HOARAU, Y., Turbulence properties in the cylinder wake at high Reynolds numbers	757
LANEVILLE, A., On vortex-induced vibrations of cylinders describing X - Y trajectories	773
DE LANGRE, E., Frequency lock-in is caused by coupled-mode flutter	783
THOMPSON, M.C., HOURIGAN, K., RYAN, K. AND SHEARD, G.J., Wake transition of two-dimensional cylinders and axisymmetric bluff bodies	793
DAHL, J.M., HOVER, F.S. AND TRIANTAFYLLOU, M.S., Two-degree-of-freedom vortex-induced vibrations using a force assisted apparatus	807
ASSI, G.R.S., MENEGHINI, J.R., ARANHA, J.A.P., BEARMAN, P.W. AND CASAPRIMA, E., Experimental investigation of flow-induced vibration interference between two circular cylinders	819
BRANKOVIĆ, M. AND BEARMAN, P.W., Measurements of transverse forces on circular cylinders undergoing vortex-induced vibration	829
HOROWITZ, M. AND WILLIAMSON, C.H.K., Dynamics of a rising and falling cylinder	837
KLAMO, J.T., LEONARD, A. AND ROSHKO, A., The effects of damping on the amplitude and frequency response of a freely vibrating cylinder in cross-flow	845
LEONTINI, J.S., THOMPSON, M.C. AND HOURIGAN, K., The beginning of branching behaviour of vortex-induced vibration during two-dimensional flow	857
PRASANTH, T.K., BEHARA, S., SINGH, S.P., KUMAR, R. AND MITTAL, S., Effect of blockage on vortex-induced vibrations at low Reynolds numbers	865
MORSE, T.L. AND WILLIAMSON, C.H.K., Employing controlled vibrations to predict fluid forces on a cylinder undergoing vortex-induced vibration	877
WILLDEN, R.H.J. AND GRAHAM, J.M.R., Three distinct response regimes for the transverse Vortex-Induced Vibrations of circular cylinders at low Reynolds numbers	885
HUERA HUARTE, F.J., BEARMAN, P.W. AND CHAPLIN, J.R., On the force distribution along the axis of a flexible circular cylinder undergoing multi-mode vortex-induced vibrations	897
