

Keyword index to Volume 19

- 12,13,17-trihydroxy-9(Z)-octadecenoic acid 34
- α -amylase 273
- activated sludge 118
- adhesion 142
- AFM 142
- agrochemicals 392
- air conditioners, fungi 150
- alkylethoxylate 252
- alkylphenolethoxylate 252
- amplification 18
- Amycolatopsis orientalis* 280
- androst-4-en-3,17-dione 269
- antagonist 163
- antibiotics 220
- arabinofuranosidase 1
- aromatic 385
- astaxanthin 114, 263
- automobiles 150
- azo-dyes 49
- β -galactosidase 239
- β -lactam 18
- B cell epitopes 56
- Bacilli* 134
- Bacillus brevis* 227
- Bacillus subtilis* 49, 169, 273
- Bacillus thuringiensis* 294
- bacteria 188
- bacterial activity 118
- bacterial detection 286
- bacteriocin(s) 28, 294
- baculovirus–insect cell expression vector system (BEVS) 87
- barrier 104
- biocatalysis 334, 350
- biocontrol agents 160
- bioconversion 34
- biodegradation 350, 385, 401, 408
- biofilm 142, 299
- biofungicide(s) 160, 192
- biological control 158, 163, 169, 172, 180, 188, 220
- biological fungicide 192
- biological pesticide 192
- biomatrix 139
- biopesticide 192
- bioremediation 43, 130, 324
- biosurfactant 232
- biosynthesis 83, 334
- biotransformation 324
- biphenyl 355, 408
- Burkholderia pickettii* PKO1 360
- canthaxanthin 263
- carbacephem 334, 369
- Carnobacteria 28
- carotenoid profile 263
- carotenoids 114
- castor oil 39
- catechol 385
- cation chelator 280
- cephalosporin C 334
- chemo-enzymatic synthesis 369
- chitinase 196
- Chlamydia trachomatis* 71
- cholesterol 269
- classification 77
- Clavibacter* 34
- co-immobilized cells 39
- colonization factors 66
- Comamonas* 401
- complementation 92
- confocal laser scanning microscopy (CLSM) 104
- contaminated 43
- corn 273
- CTC 118
- Cyanobacterium* 130
- cyclodepsipeptide 7
- cyclopeptolide 7
- danofloxacin 378
- dehalogenation 350
- delta-endotoxin 202
- destruxin 7
- diastereospecificity 369
- dicamba 344
- dicamba-metabolizing enzymes 344
- dioxygenase 355, 385
- dissolved hydrogen 246
- diversity 77
- dye removal 49
- ECB antifungal agent 334
- EDDS 280
- electron transport 355
- encapsulation 43
- engineering crop selectivity 344
- enterotoxigenic *E. coli* 66
- epitope mapping 71
- ethanol 114, 299
- exopolysaccharide 92
- extracellular 239
- extracellular polysaccharide 139
- Fe²⁺ limitation 246
- fed-batch fermentation 280
- fermentation 12, 232, 299
- ferredoxin 355
- fluoropolymer 142
- foliar disease 188
- food packaging 104
- foreign gene expression 92
- formazan 118
- fumonisin 305
- fungal colonization 150
- fungi 180, 188, 324
- Fusarium proliferatum* 305
- Fusarium* spp 169
- gas-to-liquid mass transfer 246
- gene cloning 134
- gene expression 134
- genetically engineered microorganisms 252
- glutathione-S-transferase 87
- Gossypium* spp 169
- gp120 58
- gp41 58
- growth yield 246
- helvolic acid 7
- heterologous expression 202
- heterologous genes 196
- HIV antibodies 58
- HIV vaccines 58
- HSV protease 87
- human growth hormone 227
- hydrophobicity 142
- immobilization 139
- immunosuppressants 83
- induced resistance 158, 160
- informatics 350
- insecticidal crystal protein 202
- insects 180
- ion-channel 202
- keratinase 134
- kinetics 163
- laccase 130
- lactic acid bacteria 28
- linear epitopes 56, 66
- linoleic acid 34
- liquid culture production 180
- lysine 83
- macrolides 83
- major cold-shock protein 286
- maraschino 12
- mass spectrometry 273
- meta* cleavage 385
- metabolite reference standards 392
- Metarhizium anisopliae* 7
- metal ions 280
- Methanobacterium thermoautotrophicum* 246
- methylation 98
- microbes 104
- microbial selection strategies 172
- microbial synthesis 392
- microbial transformations 378, 392
- migration 104
- mineralization 43
- modelling 49
- molasses 39
- molecular evolution 360

- multicomponent oxygenases 360
mutation 273
Mycobacterium 269
mycoparasite 188
mycotoxin 305
- n-butyl *p*-hydroxybenzoate 39
N-ethylmaleimide 123
naphthalene 401, 408
natural fungicides 158
nitrobenzene 385
nitrogen nutrition 83
nitrophenol 123
nonylphenoldiethoxylate 252
- oxygenases 350
- p*-aminoazobenzene 49
paper and paperboard 104
pathogenicity 77
PCR 286
penicillin 18
pentachlorophenol 43
PEPSCAN 56, 58
peptide vaccine 56, 66
pesticide 202
Phaffia rhodozyma 114, 263
phage random peptide libraries 71
phenanthrene 401, 408
phenol 130
phenol hydroxylase 360
pili 56
plant defense 196
PLP 369
polychlorinated biphenyl 355
polycyclic 401, 408
polycyclic aromatic hydrocarbons 324
polyphenol oxidase 130
- Porphyridium cruentum* 139
postharvest decay 160
protease inhibitor 227
Pseudomonas 43, 355
Pseudomonas aeruginosa 232
Pseudomonas putida 123, 252
Pseudomonas sp strain JS150 360
purification 232, 273
- Ralstonia eutropha* 252
rapamycin 83
recombination 18
reduction 98
reutilization 39
rhamnolipid 232
Rhizoctonia spp 169
Rhizomucor 239
rhizosphere 169
Rhodobacter sphaeroides 98
Rieske iron-sulfur protein 355
- Saccharomyces cerevisiae* 12, 299
scab disease 220
screen for dicamba-metabolizing enzymes
344
secretion 227
selenate 98
selenite 98
serine hydroxymethyltransferase 369
Sf-9 87
soil 43
solid state fermentation 239
sorghum 273
Sphingomonas 92, 408
stainless steel 142
statistical data analysis 58
strain improvement 18
Streptomyces hygroscopicus 83
- Streptomyces scabies* 220
substrate affinity constant 246
sulfite 12
sulfur dioxide 12
suppression 220
synergism 158
synthetic medium 280
- testosterone 269
tetrazolium salt 118
thermophilic fungus 239
thermostable 273
tochicin 294
transcriptional regulation 360
transgenic plants 202
transport 123
trihydroxy fatty acid 34
tylosin 334
- universal primer oligomers 286
unsaturated fatty acids 34
uptake 123
- waste water treatment 118
weeds 180
- xanthan gum 92
Xanthomonas 77
Xanthomonas campestris 92
xylan 1
xylan-degrading enzymes 1
xylanase 1
xylene 408
- yam peel 273
yeast 12
