Editorial

With this issue of The Journal, we start our fourth year of publication and, hopefully, our fourth year of service to the scientific community.

I take this opportunity to thank everyone who has helped me bring The Journal to this point, especially those of you who have served as members of the Editorial Board and those who have published herein.

We've experienced phenomenal growth, having started with 6 issues in 1978, 9 in 1979, and 12 in 1980. We've published special issues dedicated to specific topics, and these have been, apparently, well received by the scientific community. I have received numerous comments from readers that all boil down to, "give us more of the same"!

The year 1981 will certainly bring "more of the same." We will increase the size of each of the 12 issues by about 30 percent; and we will continue the publication of special topics issues during 1981.

Additionally, we will start publishing "Reviews" which will be devoted exclusively to invited papers written by experts in their respective fields. Two LC Reviews issues will appear during 1981 as two supplements of The Journal.
