## THE BOOK CORNER

**RESIDUES OF VETERINARY DRUGS IN FOOD: Proceedings of the EuroResidue Conference**, Noordwijkerhout, The Netherlands, May 21-23, 1990, Editors, N. Haagsma, A. Ruiter, and P. B. Czedik-Eysenberg.

The book is based on the papers and posters presented at the EuroResidue Conference, the first European conference on residues of veterinary drugs in foods. The conference was organized due to increasing concern of consumers for the veterinary drug residues in foods of animal origin.

This volume covers various aspects related to residues of veterinary drugs, with special emphasis on recent development and application of various analytical techniques.

The Keynote lectures included;

1. **Veterinary Medicine Products: Their Pharmacokinetics in Relation to the Residue Problem**, M. Debackere
2. **Sample Pretreatment in Drug Residue Analysis**, N. Haagsma
3. **Trends and Perspectives in Analytical Methodology**, M. Petz
4. **Toxicological Assessment of Xenobiotics in Food of Animal Origin**, Ch. Schlatter
5. **Quality Criteria in Drug Residue Analysis**, R.W. Stephany
6. **Control of Veterinary Drug Residues in Food**, G. M. Telling

Sixty six other presentations addressed the problem of residues in food of animal origin; several of them discussed new or improved methods for the determination of residues below legal tolerance limits.

The proceedings are available from Dr. N. Haagsma, Faculty of Veterinary Medicine, University of Utrecht, P.O.Box 80.175, NL-3508 TD Utrecht. Cost Dfl. 75 (add Dfl.15, transfer cost).
