LETTER FROM THE EDITOR

Announcing "New Interpretations"

At a recent meeting of the Editorial Board held in San Francisco during the spring American Chemical Society meeting, it was decided to institute a section of the journal to be entitled "New Interpretations."

"New Interpretations" will consist of short expository notes which are to be educational in character. These notes should be more than exercises but need not be totally original. Rather than duplicate what can be found in conventional texts, "New Interpretations" will seek to complement such texts in a clear fashion.

If you wish to share your conceptual insight concerning synthetic, kinetic, or other aspects of polymers, please submit notes for publication to:

Dr. K. F. O'Driscoll
