## EDITORIAL

After one year as Editor of this journal, I feel that there has been considerable progress, and it is my express endeavor to proceed further in the same direction.

The steps taken to strengthen the reviewing process and to raise acceptance standards are beginning to bear fruit. The format of "Note" has been introduced for papers reporting competent investigations of limited scope. Copy editing has been elaborated to insure adequate comprehensibility and style.

The timing of publication has also been greatly improved. The delay between submission and publication of accepted papers has been reduced, but it should be even shorter. I am hoping to cut it to about nine months, which approaches the minimum required for review, revision, editing, and production.

I solicit the continued support of contributors and reviewers to realize my objectives.

H. K. Frensdorff
