EDITORIAL

***Macromolecular Reports* has come a long way from its concept to its final eye-catching white and blue volumes that appeared in 1991. It has an international editorial board of highly experienced scientists from both academe and industry. This new international technical journal is targeted to provide rapid dissemination of new discoveries in polymer science. While there are many journals devoted to macromolecules, they take a long time to get the submitted articles into print. *Macromolecular Reports* thus fills a well identified need. The truly global nature of the journal is evidenced by articles originating from both academe and industry by authors from Canada, China, Czechoslovakia, France, Germany, Israel, India, Japan, Turkey, UK, USSR, in addition to the USA.**

Three issues were published in 1991. The last issue, Volume A28 (Supplement 3), includes indexes to volume A28. We now know that this new journal is on solid ground, and that it will continue to serve as a source of innovative ideas to the macromolecular community. Special thanks go to all who submitted papers and contributed to its high standards and growth.

We look forward to your contributions in both theoretical and applied polymer science for further growth in both quantity and quality of papers we publish. We wish you a happy new year and the very best for 1992.
