

Symposia announcement

The Metallurgical Society of the American Institute of Mining, Metallurgical and Petroleum Engineers (AIME) is to sponsor two back-to-back special symposia in 1975 on Composite Materials. The first meeting will be held in Geneva during the week of 1 April 1975. The second meeting will be in Boston, Massachusetts the following week to report and discuss the Geneva Conference papers and the presentation of additional selected papers.

There will be seven sessions at each symposium covering the following topics:

Advanced Filaments, Fibres and Whiskers; Advanced Matrix Materials; Mechanics and physical properties; Design (to include Thermal, Electrical, Chemical and Mechanical); Fabrication - Methods and Evaluation; Testing; and Commercial Applications to Structures and Devices.
