

CONTENTS BY KEYWORD

Adhesion	Influence of rare earth surface treatment on tensile properties of aramid fiber reinforced epoxy composites J. Wu <i>et al.</i>	289
Amorphous materials	Film thickness and deposition rate dependence of thermoelectric power of Cu-GeO ₂ thin cermet films I. Lucy	319
	Phase changes induced in hexagonal boron nitride by high energy mechanical milling P. B. Wheelock <i>et al.</i>	343
Biomaterials	Structural differences in the cortical bone of Turkey tibia Y.-S. Chen <i>et al.</i>	207
	Hardness of electron beam deposited titanium carbide films on titanium substrate D. Ferro <i>et al.</i>	329
	Fabrication of alternating polycation and albumin multilayer coating by electrostatic layer-by-layer adsorption J. Ji <i>et al.</i>	349
	Biocompatibility tests with fibroblasts of CaO rich calcium silicate glasses M. Catauro <i>et al.</i>	373
Cellular materials	Biocompatibility tests with fibroblasts of CaO rich calcium silicate glasses M. Catauro <i>et al.</i>	373
Ceramics	The role of TiO ₂ and composition in the devitrification of near-stoichiometric cordierite D. T. Weaver <i>et al.</i>	51
	Microstructure and electrical properties of ZnO-Pr ₆ O ₁₁ -CoO-Cr ₂ O ₃ -Dy ₂ O ₃ -based varistor ceramics C.-W. Nahm <i>et al.</i>	307
	Studies of structural, dielectric and electrical behavior of Pb(Mn _{1/4} Co _{1/4} W _{1/2})O ₃ ceramics S. K. Sinha <i>et al.</i>	315
	Phase changes induced in hexagonal boron nitride by high energy mechanical milling P. B. Wheelock <i>et al.</i>	343
Characterization methods	Analysis of Ir-base alloys Y. Yamabe-Mitarai <i>et al.</i>	299
Chemical vapour deposition	Candidate oxidation resistant coatings via combustion chemical vapor deposition S. Shanmugham <i>et al.</i>	377
Coatings	Fabrication of alternating polycation and albumin multilayer coating by electrostatic layer-by-layer adsorption J. Ji <i>et al.</i>	349
Composite materials	6061 Al reinforced with zirconium diboride particles processed by conventional powder metallurgy and mechanical alloying J. B. Fogagnolo <i>et al.</i>	127
	Mechanism of <i>in situ</i> formation of AlN in Al melt using nitrogen gas Q. Zheng <i>et al.</i>	141
	Influence of rare earth surface treatment on tensile properties of aramid fiber reinforced epoxy composites J. Wu <i>et al.</i>	289
	Evaluation of the fitting efficiencies of general effective medium equation and its modification Z. Xuanhe <i>et al.</i>	291
	Microstructure and thermal conduction properties of an Al-12Si matrix composite reinforced with dual sized SiC particles Q. Zhang <i>et al.</i>	303
	Influence of kink bands on the tensile strength of flax fibers C. Baley	331
	Formation of <i>p-n</i> junction by plasma spraying technique to enhance the photocatalytic activity of TiO ₂ F. Ye <i>et al.</i>	353
Computer simulations	Evaluation of the fitting efficiencies of general effective medium equation and its modification Z. Xuanhe <i>et al.</i>	291
Corrosion and oxidation	Candidate oxidation resistant coatings via combustion chemical vapor deposition S. Shanmugham <i>et al.</i>	377
Crystallization	The role of TiO ₂ and composition in the devitrification of near-stoichiometric cordierite D. T. Weaver <i>et al.</i>	51
Defects	Study on the interaction between a dislocation and impurities in KCl:Sr ²⁺ single crystals by the Blaha effect Part III <i>Influence of heat treatment on various characteristics</i> Y. Kohzuki <i>et al.</i>	107
	Influence of kink bands on the tensile strength of flax fibers C. Baley	331
	Fatigue strength variation by crack initiation origin of surface hardened Cr-Mo steel alloy S.-H. Song <i>et al.</i>	335
	Effect of surface carbon and oxygen on the structural quality of silicon homoepitaxial films H. W. Kim	361
Deformation and fracture	Effects of deformation on hydrogen degradation in a duplex stainless steel S. S. Chen <i>et al.</i>	67
Deposition techniques	Synthesis of carbon nanowires using dc pulsed corona discharge plasma reaction M.-W. Li <i>et al.</i>	283
	Formation of <i>p-n</i> junction by plasma spraying technique to enhance the photocatalytic activity of TiO ₂ F. Ye <i>et al.</i>	353
Diffusion	Effects of deformation on hydrogen degradation in a duplex stainless steel S. S. Chen <i>et al.</i>	67
	An <i>in situ</i> TEM study of phase formation in gold-aluminum couples D. E. Eakins <i>et al.</i>	165
	Role of colloid dynamics in the formation of Liesegang rings in multi-component systems J. George <i>et al.</i>	311

(Continued)

Electrical properties	Evaluation of the fitting efficiencies of general effective medium equation and its modification Z. Xuanhe <i>et al.</i>	291
	Microstructure and electrical properties of ZnO-Pr ₆ O ₁₁ -CoO-Cr ₂ O ₃ -Dy ₂ O ₃ -based varistor ceramics C.-W. Nahm <i>et al.</i>	307
	Studies of structural, dielectric and electrical behavior of Pb(Mn _{1/4} Co _{1/4} W _{1/2})O ₃ ceramics S. K. Sinha <i>et al.</i>	315
	Film thickness and deposition rate dependence of thermoelectric power of Cu-GeO ₂ thin cermet films I. Lucy	319
Electrochemistry	Synthesis of Al-doped LiMn ₂ O ₄ spinels by mechanical alloying and rotary heating . . . G.-M. Song <i>et al.</i>	357
Electron beam techniques	An <i>in situ</i> TEM study of phase formation in gold-aluminum couples D. E. Eakins <i>et al.</i>	165
Electronic materials	Synthesis of Al-doped LiMn ₂ O ₄ spinels by mechanical alloying and rotary heating . . . G.-M. Song <i>et al.</i>	357
Epitaxial growth	Effect of surface carbon and oxygen on the structural quality of silicon homoepitaxial films H. W. Kim	361
Fatigue	Fatigue strength variation by crack initiation origin of surface hardened Cr-Mo steel alloy S.-H. Song <i>et al.</i>	335
	Fatigue voids in structural Al-alloys under high-frequency cyclic loading Q. Y. Wang <i>et al.</i>	365
Fracture	Fatigue strength variation by crack initiation origin of surface hardened Cr-Mo steel alloy S.-H. Song <i>et al.</i>	335
Gelation	Role of colloid dynamics in the formation of Liesegang rings in multi-component systems J. George <i>et al.</i>	311
Glasses	The role of TiO ₂ and composition in the devitrification of near-stoichiometric cordierite D. T. Weaver <i>et al.</i>	51
	Biocompatibility tests with fibroblasts of CaO rich calcium silicate glasses M. Catauro <i>et al.</i>	373
Hardness	Hardness of electron beam deposited titanium carbide films on titanium substrate D. Ferro <i>et al.</i>	329
Heat treatment	Fatigue strength variation by crack initiation origin of surface hardened Cr-Mo steel alloy S.-H. Song <i>et al.</i>	335
	Candidate oxidation resistant coatings via combustion chemical vapor deposition S. Shanmugham <i>et al.</i>	377
Imaging	Synthesis of carbon nanowires using dc pulsed corona discharge plasma reaction M.-W. Li <i>et al.</i>	283
Intercalation	Novel pyrene and 8-anilino-1-naphthalenesulfonic acid-MoS ₂ intercalates R. Bissessur <i>et al.</i>	119
	Templated growth of mesoporous aluminum phosphate tubules using protein molecules of tobacco J. Chakraborty <i>et al.</i>	285
	Synthesis and characterization of PVC/montmorillonite nanocomposite F. L. Gong <i>et al.</i>	293
Interfaces	Influence of rare earth surface treatment on tensile properties of aramid fiber reinforced epoxy composites J. Wu <i>et al.</i>	289
	Role of colloid dynamics in the formation of Liesegang rings in multi-component systems J. George <i>et al.</i>	311
Intermetallic alloys and compounds	An <i>in situ</i> TEM study of phase formation in gold-aluminum couples D. E. Eakins <i>et al.</i>	165
	Analysis of Ir-base alloys Y. Yamabe-Mitarai <i>et al.</i>	299
Kinetics	Mechanism of <i>in situ</i> formation of AlN in Al melt using nitrogen gas Q. Zheng <i>et al.</i>	141
Laser processing	Microstructural evolution of tool steels after Nd-YAG laser repair welding M. Vedani	241
	Material properties essential for cavitation erosion of laser produced surface alloys B. G. Gireñ	295
Mechanical properties	Effects of deformation on hydrogen degradation in a duplex stainless steel S. S. Chen <i>et al.</i>	67
	6061 Al reinforced with zirconium diboride particles processed by conventional powder metallurgy and mechanical alloying J. B. Fogagnolo <i>et al.</i>	127
	Influence of kink bands on the tensile strength of flax fibers C. Baley	331
Metals and alloys	Characteristics of α -dendritic and eutectic structures in Sr-treated Al-Si casting alloys L. Liu <i>et al.</i>	215
	Microstructural evolution of tool steels after Nd-YAG laser repair welding M. Vedani	241
	Analysis of Ir-base alloys Y. Yamabe-Mitarai <i>et al.</i>	299
Microstructure	Characteristics of α -dendritic and eutectic structures in Sr-treated Al-Si casting alloys L. Liu <i>et al.</i>	215
	Microstructural evolution of tool steels after Nd-YAG laser repair welding M. Vedani	241
	Microstructure and electrical properties of ZnO-Pr ₆ O ₁₁ -CoO-Cr ₂ O ₃ -Dy ₂ O ₃ -based varistor ceramics C.-W. Nahm <i>et al.</i>	307
	Effect of thermal annealing on the surface, optical, and structural properties of <i>p</i> -type ZnSe thin films grown on GaAs (100) substrates M. J. Kim <i>et al.</i>	323
Modelling	Interpretation of climatic temperature variations for accelerated ageing models P. Purnell	113

(Continued)

Multilayer structure	Fabrication of alternating polycation and albumin multilayer coating by electrostatic layer-by-layer adsorption J. Ji <i>et al.</i>	349
Nanocomposites	Novel pyrene and 8-anilino-1-naphthalenesulfonic acid-MoS ₂ intercalates R. Bissessur <i>et al.</i>	119
	Templated growth of mesoporous aluminum phosphate tubules using protein molecules of tobacco J. Chakraborty <i>et al.</i>	285
	Synthesis and characterization of PVC/montmorillonite nanocomposite F. L. Gong <i>et al.</i>	293
Nanomaterials	Synthesis of carbon nanowires using dc pulsed corona discharge plasma reaction M.-W. Li <i>et al.</i>	283
Optical materials and properties	Effect of thermal annealing on the surface, optical, and structural properties of <i>p</i> -type ZnSe thin films grown on GaAs (100) substrates M. J. Kim <i>et al.</i>	323
Phase transformations	Phase changes induced in hexagonal boron nitride by high energy mechanical milling P. B. Wheelock <i>et al.</i>	343
	Nucleation and growth of μ phase K. Zhao <i>et al.</i>	369
Plasma deposition	Synthesis of carbon nanowires using dc pulsed corona discharge plasma reaction M.-W. Li <i>et al.</i>	283
	Formation of <i>p-n</i> junction by plasma spraying technique to enhance the photocatalytic activity of TiO ₂ F. Ye <i>et al.</i>	353
Porosity	Templated growth of mesoporous aluminum phosphate tubules using protein molecules of tobacco J. Chakraborty <i>et al.</i>	285
Powder technology	6061 Al reinforced with zirconium diboride particles processed by conventional powder metallurgy and mechanical alloying J. B. Fogagnolo <i>et al.</i>	127
Semiconductors	Effect of thermal annealing on the surface, optical, and structural properties of <i>p</i> -type ZnSe thin films grown on GaAs (100) substrates M. J. Kim <i>et al.</i>	323
Sintering	Synthesis of Al-doped LiMn ₂ O ₄ spinels by mechanical alloying and rotary heating G.-M. Song <i>et al.</i>	357
Solidification	Characteristics of α -dendritic and eutectic structures in Sr-treated Al–Si casting alloys L. Liu <i>et al.</i>	215
Thermal properties	Interpretation of climatic temperature variations for accelerated ageing models P. Purnell	113
	Microstructure and thermal conduction properties of an Al-12Si matrix composite reinforced with dual sized SiC particles Q. Zhang <i>et al.</i>	303
	Film thickness and deposition rate dependence of thermoelectric power of Cu-GeO ₂ thin cermet films I. Lucy	319
	Candidate oxidation resistant coatings via combustion chemical vapor deposition S. Shanmugham <i>et al.</i>	377
Thin and thick film coatings	Hardness of electron beam deposited titanium carbide films on titanium substrate D. Ferro <i>et al.</i>	329
Wear	Material properties essential for cavitation erosion of laser produced surface alloys B. G. Gireñ	295
X-ray techniques	Studies of structural, dielectric and electrical behavior of Pb(Mn _{1/4} Co _{1/4} W _{1/2})O ₃ ceramics S. K. Sinha <i>et al.</i>	315
