

Subject index

Amorphization and Amorphous Materials

- Heavy-ion irradiation effects on structures and acid dissolution of pyrochlores, B.D. Begg, N.J. Hess, W.J. Weber, R. Devanathan, J.P. Icenhower, S. Thevuthasan and B.P. McGrail 288 (2001) 208

Carbon

- O₂ erosion of graphite tile substrates, J.W. Davis, C.G. Hamilton and A.A. Haasz 288 (2001) 148
- Evaluation of chemical erosion data for carbon materials at high ion fluxes using Bayesian probability theory, V. Dose, R. Preuss and J. Roth 288 (2001) 153
- Tritium depth profiles in graphite and carbon fibre composite material exposed to tokamak plasmas, R.-D. Penzhorn, N. Bekris, U. Berndt, J.P. Coad, H. Ziegler and W. Nägele 288 (2001) 170

Cavities (includes Voids, Holes)

- Fission gas release and swelling model of metallic fast reactor fuel, C.B. Lee, D.H. Kim and Y.H. Jung 288 (2001) 29

Ceramics (not listed elsewhere)

- Heavy-ion irradiation effects on structures and acid dissolution of pyrochlores, B.D. Begg, N.J. Hess, W.J. Weber, R. Devanathan, J.P. Icenhower, S. Thevuthasan and B.P. McGrail 288 (2001) 208

Chemical Reactions (includes Electrochemical and Thermo-chemical Reactions)

- Evaluation of chemical erosion data for carbon materials at high ion fluxes using Bayesian probability theory, V. Dose, R. Preuss and J. Roth 288 (2001) 153
- Effects of temperature and contact stress on the sliding wear of Ni-base Deloro 50 hardfacing alloy, S.-J. Kim and J.-K. Kim 288 (2001) 163
- Some aspects of the use of ZrN as an inert matrix for actinide fuels, M. Burghartz, G. Ledergerber, H. Hein, R.R. van der Laan and R.J.M. Konings 288 (2001) 233

Compatibility and Corrosion (include Stress Corrosion Cracking)

- Stress corrosion cracking on irradiated 316 stainless steel, G. Furutani, N. Nakajima, T. Konishi and M. Kodama 288 (2001) 179
- Influence of precipitate density on the nodular corrosion resistance of Zr–Sn–Fe–Cr alloys at 500°C, D. Charquet 288 (2001) 237

Crystallographic Properties

- Phase equilibria and magnetism in the Mo–Si–U system, P. Rogl, T. Le Bihan and H. Noël 288 (2001) 66

Diffusion

- Cracks as sink of irradiation created point defects, A. Sarce 288 (2001) 130
- On the role of grain boundary diffusion in fission gas release, D.R. Olander and P. Van Uffelen 288 (2001) 137

Embrittlement

- A fracture mechanics analysis of the PWR nuclear power plant reactor pressure vessel beltline weld, L.-j. Young 288 (2001) 197

Fission Products

- Fission gas release and swelling model of metallic fast reactor fuel, C.B. Lee, D.H. Kim and Y.H. Jung 288 (2001) 29
- Measurement and analysis of fission gas release from BNFL's SBR MOX fuel, R.J. White, S.B. Fisher, P.M.A. Cook, R. Stratton, C.T. Walker and I.D. Palmer 288 (2001) 43

Fracture and Fracture Toughness

- Cracks as sink of irradiation created point defects, A. Sarce 288 (2001) 130
- A fracture mechanics analysis of the PWR nuclear power plant reactor pressure vessel beltline weld, L.-j. Young 288 (2001) 197

Fuels and Fuel Elements

- Rim structure formation of isothermally irradiated UO₂ fuel discs, K. Une, K. Nogita, T. Shiratori and K. Hayashi 288 (2001) 20

Grain Boundaries

On the role of grain boundary diffusion in fission gas release, D.R. Olander and P. Van Uffelen 288 (2001) 137

Hydrogen and Hydrides (*includes Deuterium and Deuterides*)

Studies on hydrogen permeability of 2.25% Cr–1% Mo ferritic steel: correlation with microstructure, N. Parvathavarthini, S. Saroja, R.K. Dayal and H.S. Khatak 288 (2001) 187

Ion Irradiation

Evaluation of chemical erosion data for carbon materials at high ion fluxes using Bayesian probability theory, V. Dose, R. Preuss and J. Roth 288 (2001) 153

Heavy-ion irradiation effects on structures and acid dissolution of pyrochlores, B.D. Begg, N.J. Hess, W.J. Weber, R. Devanathan, J.P. Icenhower, S. Thevuthasan and B.P. McGrail 288 (2001) 208

Iron, Iron alloys (*excludes Steels*) **and Compounds**

Influence of precipitate density on the nodular corrosion resistance of Zr–Sn–Fe–Cr alloys at 500°C, D. Charquet 288 (2001) 237

Joining

A fracture mechanics analysis of the PWR nuclear power plant reactor pressure vessel beltline weld, L.-j. Young 288 (2001) 197

Mechanical Properties (*not listed elsewhere*)

Effect of hydrogen on the ductility reduction of F82H martensitic steel after different heat treatments, M. Beghini, G. Benamati, L. Bertini, I. Ricapito and R. Valentini 288 (2001) 1

Effects of temperature and contact stress on the sliding wear of Ni-base Deloro 50 hardfacing alloy, S.-J. Kim and J.K. Kim 288 (2001) 163

Microstructure and mechanical properties of Inconel 625 superalloy, V. Shankar, K. Bhanu Sankara Rao and S.L. Mannan 288 (2001) 222

Molybdenum, Molybdenum Alloys and Compounds

Studies on hydrogen permeability of 2.25% Cr–1% Mo ferritic steel: correlation with microstructure, N. Parvathavarthini, S. Saroja, R.K. Dayal and H.S. Khatak 288 (2001) 187

Neutron Irradiation

Rim structure formation of isothermally irradiated UO₂ fuel discs, K. Une, K. Nogita, T. Shiratori and K. Hayashi 288 (2001) 20

Thermal conductivities of irradiated UO₂ and (U,Gd)O₂, K. Minato, T. Shiratori, H. Serizawa, K. Hayashi, K. Une, K. Nogita, M. Hirai and M. Amaya 288 (2001) 57

Stress corrosion cracking on irradiated 316 stainless steel, G. Furutani, N. Nakajima, T. Konishi and M. Kodama 288 (2001) 179

Nickel, Nickel Alloys and Compounds

Effects of temperature and contact stress on the sliding wear of Ni-base Deloro 50 hardfacing alloy, S.-J. Kim and J.-K. Kim 288 (2001) 163

Microstructure and mechanical properties of Inconel 625 superalloy, V. Shankar, K. Bhanu Sankara Rao and S.L. Mannan 288 (2001) 222

Phase Equilibria (*includes Constitution, Phase Stability, Phase Instability*)

Phase equilibria and magnetism in the Mo–Si–U system, P. Rogl, T. Le Bihan and H. Noël 288 (2001) 66

The Sn–Ti–Zr system: equilibrium phases at 900°C, S.F. Aricó and L.M. Gribaudo 288 (2001) 217

Plasma–Materials Interaction

O₂ erosion of graphite tile substrates, J.W. Davis, C.G. Hamilton and A.A. Haasz 288 (2001) 148

Evaluation of chemical erosion data for carbon materials at high ion fluxes using Bayesian probability theory, V. Dose, R. Preuss and J. Roth 288 (2001) 153

Powder Processes and Products

Nanocrystalline thoria powders via glycine-nitrate combustion, R.D. Purohit, S. Saha and A.K. Tyagi 288 (2001) 7

A mechanism for the sintered density decrease of UO₂–Gd₂O₃ pellets under an oxidizing atmosphere, K.W. Song, K.S. Kim, J.H. Yang, K.W. Kang and Y.H. Jung 288 (2001) 92

Precipitates and Precipitation

Influence of precipitate density on the nodular corrosion resistance of Zr–Sn–Fe–Cr alloys at 500°C, D. Charquet 288 (2001) 237

Radiation Effects: Atomic Defects

Cracks as sink of irradiation created point defects, A. Sarce 288 (2001) 130

Radiation Effects: Extended Defects, Microstructures

Rim structure formation of isothermally irradiated UO₂ fuel discs, K. Une, K. Nogita, T. Shiratori and K. Hayashi 288 (2001) 20

Radiation Effects: Mechanical Properties

A fracture mechanics analysis of the PWR nuclear power plant reactor pressure vessel beltline weld, L.-j. Young 288 (2001) 197

Radiolysis

Alpha-radiolysis effects on UO₂ alteration in water, G. Sattonnay, C. Ardois, C. Corbel, J.F. Lucchini, M.-F. Barthe, F. Garrido and D. Gosset 288 (2001) 11

Steels, Austenitic

Stress corrosion cracking on irradiated 316 stainless steel, G. Furutani, N. Nakajima, T. Konishi and M. Kodama 288 (2001) 179

Microstructure and mechanical properties of Inconel 625 superalloy, V. Shankar, K. Bhanu Sankara Rao and S.L. Mannan 288 (2001) 222

Steels, Ferritic

Effect of hydrogen on the ductility reduction of F82H martensitic steel after different heat treatments, M. Beghini, G. Benamati, L. Bertini, I. Ricapito and R. Valentini 288 (2001) 1

Studies on hydrogen permeability of 2.25% Cr–1% Mo ferritic steel: correlation with microstructure, N. Parvathavarthini, S. Saroja, R.K. Dayal and H.S. Khatak 288 (2001) 187

The effects of tungsten addition on the microstructural stability of 9Cr–Mo Steels, S.G. Hong, W.B. Lee and C.G. Park 288 (2001) 202

Structural Materials

Microstructure and mechanical properties of Inconel 625 superalloy, V. Shankar, K. Bhanu Sankara Rao and S.L. Mannan 288 (2001) 222

Surface Effects

O₂ erosion of graphite tile substrates, J.W. Davis, C.G. Hamilton and A.A. Haasz 288 (2001) 148

Swelling

Rim structure formation of isothermally irradiated UO₂ fuel discs, K. Une, K. Nogita, T. Shiratori and K. Hayashi 288 (2001) 20

Fission gas release and swelling model of metallic fast reactor fuel, C.B. Lee, D.H. Kim and Y.H. Jung 288 (2001) 29

Theory and Modelling

Fission gas release and swelling model of metallic fast reactor fuel, C.B. Lee, D.H. Kim and Y.H. Jung 288 (2001) 29

Cracks as sink of irradiation created point defects, A. Sarce 288 (2001) 130

Evaluation of chemical erosion data for carbon materials at high ion fluxes using Bayesian probability theory, V. Dose, R. Preuss and J. Roth 288 (2001) 153

Thermal Reactors

A fracture mechanics analysis of the PWR nuclear power plant reactor pressure vessel beltline weld, L.-j. Young 288 (2001) 197

Thermodynamic Properties

Thermodynamic modelling of the C–U and B–U binary systems, P.Y. Chevalier and E. Fischer 288 (2001) 100

Thermophysical Properties

Thermal conductivities of irradiated UO₂ and (U,Gd)O₂, K. Minato, T. Shiratori, H. Serizawa, K. Hayashi, K. Une, K. Nogita, M. Hirai and M. Amaya 288 (2001) 57

Physical properties of thorium oxalate powders and their influence on the thermal decomposition, E. Oktay and A. Yayli 288 (2001) 76

Bulk thermal expansion studies of Th_{1-x}Ce_xO₂ in the complete solid solution range, M.D. Mathews, B.R. Ambekar and A.K. Tyagi 288 (2001) 83

Thermal conductivity of U₃O₈ from 300 to 1100 K, C.G.S. Pillai, A.K. Dua and P. Raj 288 (2001) 87

Thorium, Thorium Alloys and Compounds

Nanocrystalline thoria powders via glycine-nitrate combustion, R.D. Purohit, S. Saha and A.K. Tyagi 288 (2001) 7

Physical properties of thorium oxalate powders and their influence on the thermal decomposition, E. Oktay and A. Yayli 288 (2001) 76

Bulk thermal expansion studies of Th_{1-x}Ce_xO₂ in the complete solid solution range, M.D. Mathews, B.R. Ambekar and A.K. Tyagi 288 (2001) 83

Titanium, Titanium Alloys and Compounds

The Sn–Ti–Zr system: equilibrium phases at 900°C, S.F. Aricó and L.M. Gribaudo 288 (2001) 217

Tritium and Tritides

O₂ erosion of graphite tile substrates, J.W. Davis, C.G. Hamilton and A.A. Haasz 288 (2001) 148

Tritium depth profiles in graphite and carbon fibre composite material exposed to tokamak plasmas, R.-D. Penzhorn, N. Bekris, U. Berndt, J.P. Coad, H. Ziegler and W. Nägele 288 (2001) 170

Tungsten, Tungsten Alloys and Compounds

The effects of tungsten addition on the microstructural stability of 9Cr–Mo Steels, S.G. Hong, W.B. Lee and C.G. Park 288 (2001) 202

Uranium, Uranium Alloys and Compounds

Alpha-radiolysis effects on UO₂ alteration in water, G. Sattonnay, C. Ardois, C. Corbel, J.F. Lucchini, M.-F. Barthe, F. Garrido and D. Gosset 288 (2001) 11

Rim structure formation of isothermally irradiated UO₂ fuel discs, K. Une, K. Nogita, T. Shiratori and K. Hayashi 288 (2001) 20

Measurement and analysis of fission gas release from BNFL's SBR MOX fuel, R.J. White, S.B. Fisher, P.M.A. Cook, R. Stratton, C.T. Walker and I.D. Palmer 288 (2001) 43

Thermal conductivities of irradiated UO₂ and (U,Gd)O₂, K. Minato, T. Shiratori, H. Serizawa, K. Hayashi, K. Une, K. Nogita, M. Hirai and M. Amaya 288 (2001) 57

- Phase equilibria and magnetism in the Mo–Si–U system, P. Rogl, T. Le Bihan and H. Noël 288 (2001) 66
- Thermal conductivity of U_3O_8 from 300 to 1100 K, C.G.S. Pillai, A.K. Dua and P. Raj 288 (2001) 87
- A mechanism for the sintered density decrease of UO_2 – Gd_2O_3 pellets under an oxidizing atmosphere, K.W. Song, K.S. Kim, J.H. Yang, K.W. Kang and Y.H. Jung 288 (2001) 92
- Thermodynamic modelling of the C–U and B–U binary systems, P.Y. Chevalier and E. Fischer 288 (2001) 100
- On the role of grain boundary diffusion in fission gas release, D.R. Olander and P. Van Uffelen 288 (2001) 137
- Some aspects of the use of ZrN as an inert matrix for actinide fuels, M. Burghartz, G. Ledergerber, H. Hein, R.R. van der Laan and R.J.M. Konings 288 (2001) 233
- Wastes**
- Alpha-radiolysis effects on UO_2 alteration in water, G. Sattonnay, C. Ardois, C. Corbel, J.F. Lucchini, M.-F. Barthe, F. Garrido and D. Gosset 288 (2001) 11
- Heavy-ion irradiation effects on structures and acid dissolution of pyrochlores, B.D. Begg, N.J. Hess, W.J. Weber, R. Devanathan, J.P. Icenhower, S. Thevuthasan and B.P. McGrail 288 (2001) 208
- Zirconium, Zirconium Alloys and Compounds**
- The Sn–Ti–Zr system: equilibrium phases at 900°C, S.F. Aricó and L.M. Gribaudo 288 (2001) 217
- Some aspects of the use of ZrN as an inert matrix for actinide fuels, M. Burghartz, G. Ledergerber, H. Hein, R.R. van der Laan and R.J.M. Konings 288 (2001) 233
- Raman spectra of tetragonal zirconia: powder to zircaloy oxide frequency shift, P. Barbéris, G. Corolleur-Thomas, R. Guinebretiere, T. Merle-Mejean, A. Mirgorodsky and P. Quintard 288 (2001) 241
