### Proceedings of the 10th International Symposium on Thermodynamics of Nuclear Materials

Preface .....	vii		
Contents .....	ix		
<b>Section 1. Fuel behaviour and processes</b>			
Heat capacity measurements on unirradiated and irradiated fuel pellets, <i>M. Amaya, K. Une and K. Minato</i>	1		
Phase equilibria in the UO <sub>2</sub> –PuO <sub>2</sub> system under a temperature gradient, <i>H. Kleykamp</i>	8		
An investigation of the Pu migration phenomena during irradiation in fast reactor, <i>T. Ishii and T. Asaga</i>	13		
Thermochemical data and modelling for ex-vessel corium behaviour during a severe accident, <i>E.H.P. Cordfunke, M.E. Huntelaar, F. Funke, M.K. Koch, Ch. Kortz, P.K. Mason, M.A. Mignanelli and M.S. Newland</i>	18		
Carbothermic synthesis of (Cm,Pu)N, <i>M. Takano, A. Itoh, M. Akabori, T. Ogawa, M. Numata and H. Okamoto</i>	24		
Thermal properties of hydride fuel 45% U–ZrH <sub>1.6</sub> , <i>K. Kakiuchi, N. Itagaki, T. Furuya, T. Hattori, Y. Nakazono, F. Ono, K. Yamaguchi and M. Yamawaki</i>	28		
A qualitative comparison of barium behaviour in the PHEBUS FPT0 test and analytical tests, <i>R. Dubourg and P. Taylor</i>	32		
Fission gas release and volume diffusion enthalpy in UO <sub>2</sub> irradiated at low and high burnup, <i>J.P. Hier-naut and C. Ronchi</i>	39		
Migration behaviour of iodine in nuclear fuel, <i>W.H. Hocking, R.A. Verrall and I.J. Muir</i>	45		
Thermodynamic systematics of the formation of liquid alloys of f-elements with bismuth, <i>H. Yamana, J. Sheng, K. Kawamoto and H. Moriyama</i>	53		
<b>Section 2. Vaporization</b>			
High-temperature, Knudsen cell-mass spectroscopic studies on lanthanum oxide/uranium dioxide solid solutions, <i>S. Sunder, R. McEachern and J.C. LeBlanc</i>	59		
The modelling of fuel volatilisation in accident conditions, <i>H. Manenc, P.K. Mason and M.P. Kissane</i>	64		
Vaporization chemistry of hypo-stoichiometric (U,Pu)O <sub>2</sub> , <i>R. Viswanathan and M.V. Krishnaiah</i>	69		
Thermodynamic study of liquid lithium–lead alloys using the EMF method, <i>W. Gsior and Z. Moser</i>	77		
<b>Section 3. Oxides and other materials</b>			
Mass spectrometric study of UO <sub>2</sub> –ZrO <sub>2</sub> pseudo-binary system, <i>M. Baïchi, C. Chatillon, C. Guèneau and S. Chatain</i>			84
Selected thermal properties of beryllium and phase equilibria in beryllium systems relevant for nuclear fusion reactor blankets, <i>H. Kleykamp</i>			88
Thermal properties of zirconium hydride, <i>S. Yamanaka, K. Yamada, K. Kurosaki, M. Uno, K. Takeda, H. Anada, T. Matsuda and S. Kobayashi</i>			94
Thermophysical properties of BaUO <sub>3</sub> , <i>S. Yamanaka, K. Kurosaki, T. Matsuda and M. Uno</i>			99
Thermodynamics of (Mg,Ce,U)O <sub>2+x</sub> ( $x \geq 0$ ) solid solutions, <i>T. Fujino, K. Park, N. Sato and M. Yamada</i>			104
Thermodynamic studies on ThGa <sub>2</sub> , <i>B. Prabhakara Reddy, R. Kandan, R. Babu, K. Nagarajan and P.R. Vasudeva Rao</i>			112
Some properties of a lead vanado-iodoapatite Pb <sub>10</sub> (VO <sub>4</sub> ) <sub>6</sub> I <sub>2</sub> , <i>M. Uno, M. Shinohara, K. Kurosaki and S. Yamanaka</i>			119
Thermodynamic evaluation of the quaternary U–Pu–Zr–Fe system – assessment of cladding temperature limits of metallic fuel in a fast reactor <i>M. Kurata, K. Nakamura and T. Ogata</i>			123
Thermal expansion of (Ca <sub>1-x</sub> Pu <sub>x</sub> )TiO <sub>3</sub> <i>T. Sato, Y. Hanajiri, T. Yamashita, T. Matsui and T. Nagasaki</i>			130
Enthalpy and heat capacity of (Ca <sub>1-x</sub> Pu <sub>x</sub> )TiO <sub>3</sub> ( $x = 0$ and 0.20) <i>T. Sato, S. Yamazaki, T. Yamashita, T. Matsui and T. Nagasaki</i>			135
The corrosion of Alloy 690 in high-temperature aqueous media – thermodynamic considerations, <i>R.J. Lemire and G.A. McRae</i>			141
The oxidation kinetics and the structure of the oxide film on Zircaloy before and after the kinetic transition, <i>T. Arima, T. Masuzumi, H. Furuya, K. Idemitsu and Y. Inagaki</i>			148
<b>Section 4. Basic properties</b>			
Thermodynamic analysis of chemical states of fission products in uranium–zirconium hydride fuel, <i>J. Huang, B. Tsuchiya, K. Konashi and M. Yamawaki</i>			154

Molecular dynamics study of mixed oxide fuel, <i>K. Kurosaki, K. Yamada, M. Uno, S. Yamanaka, K. Yamamoto and T. Namekawa</i>	160	Thermodynamic and mechanical properties of $\text{Ce}_{1-x}\text{Hf}_x\text{O}_2$ ( $x = 0-0.10$ ) solid solutions, <i>N. Nakajima, H. Mitani, Y. Yamamura and T. Tsuji</i>	188
X-ray photoelectron spectroscopy on uranium oxides: a comparison between bulk and thin layers, <i>S. Van den Berghe, F. Miserque, T. Gouder, B. Gaudreau and M. Verwerft</i>	168	Thermal conductivity of $(\text{U,Ce})\text{O}_2$ with and without Nd or Zr, <i>K. Kurosaki, R. Ohshima, M. Uno, S. Yamanaka, K. Yamamoto and T. Namekawa</i>	193
Application of a new thermochemical measurement method for nuclear materials at temperatures beyond 3000 K, <i>J.W. Hastie, D.W. Bonnell and P.K. Schenck</i>	175	Solubility limits and bulk thermal expansion of $\text{ThO}_2:\text{M}^{n+}$ ( $\text{M} = \text{Y}^{3+}$ , $\text{Sr}^{2+}$ and $\text{Ba}^{2+}$ ), <i>A.K. Tyagi, M.D. Mathews and R. Ramachandran</i>	198
<b>Section 5. Thermophysical properties and the thermoelectric effect</b>		Thermoelectric properties of Rh-doped $\text{Ru}_2\text{Si}_3$ prepared by floating zone melting method, <i>Y. Arita, S. Mitsuda, Y. Nishi, T. Matsui and T. Nagasaki</i>	202
Thermal properties of $\text{Mo}_3\text{Te}_4$ , <i>K. Kurosaki, A. Kosuga, M. Uno and S. Yamanaka</i>	179	Thermoelectric properties of $\text{URu}_2\text{Si}_2$ and $\text{U}_2\text{Ru}_3\text{Si}_5$ , <i>Y. Arita, K. Terao, S. Mitsuda, Y. Nishi, T. Matsui and T. Nagasaki</i>	206
Thermal expansion and solubility limits of plutonium-doped lanthanum zirconates, <i>S. Yamazaki, T. Yamashita, T. Matsui and T. Nagasaki</i>	183	Boron isotope effects on the thermoelectric properties of $\text{UB}_4$ at low temperatures, <i>Y. Nishi, Y. Arita, K. Terao, T. Matsui and T. Nagasaki</i>	209
