Proceedings of the 4th International Workshop on Spallation Materials Technology (IWSMT-4)

Preface	vii		
Contents	ix		
Section 1. General			
R&D for the Spallation Neutron Source mercury target, <i>L.K. Mansur, T.A. Gabriel, J.R. Haines and D.C. Lousteau</i>	1		
MEGAPIE, a 1 MW pilot experiment for a liquid metal spallation target, <i>G.S. Bauer, M. Salvatores and G. Heusener</i>	17		
Current status of JAERI spallation target material program, <i>K. Kikuchi, T. Sasa, S. Ishikura, K. Mukugi, T. Kai, N. Ouchi and I. Ioka</i>	34		
Status of the first SINQ irradiation experiment, STIP-I, <i>Y. Dai and G.S. Bauer</i>	43		
Section 2. Neutronics calculation and measurements of spallation produced gases			
Radiation damage to the 316 stainless steel target container vessel at SNS, <i>M.H. Barnett, M.S. Wechsler, D.J. Dudziak, L.K. Mansur and B.D. Murphy</i>	54		
Simulation of the implantation of recoils and dis- placement production in the 316 stainless steel mercury-container vessel at SNS, <i>Y. Zheng, M.S. Wechsler, D.J. Dudziak, J.D. Hunn and L.K. Mansur</i>	61		
Determination of helium and hydrogen yield from measurements on pure metals and alloys irradiated by mixed high energy proton and spallation neutron spectra in LANSCE, <i>F.A. Garner, B.M. Oliver, L.R. Greenwood, M.R. James, P.D. Ferguson, S.A. Maloy and W.F. Sommer</i>	66		
Helium production for 0.8–2.5 GeV proton induced spallation reactions, damage induced in metallic window materials, <i>D. Hilscher, C.-M. Herbach, U. Jahnke, V. Tishchenko, M. Enke, D. Filges, F. Goldenbaum, R.-D. Neef, K. Nünighoff, N. Paul, H. Schaal, G. Sterzenbach, A. Letourneau, A. Böhm, J. Galin, B. Lott, A. Péghaire and L. Pienkowski</i>	83		
Section 3. Radiation effects			
Multiscale modeling of radiation damage: applications to damage production by GeV proton irradiation of Cu and W, and pulsed irradiation effects in Cu and Fe, <i>M.J. Caturla, T. Diaz de la Rubia, M. Victoria, R.K. Corzine, M.R. James and G.A. Greene</i>	90		
Does pulsing in spallation neutron sources affect radia- tion damage?, <i>H. Trinkaus and H. Ullmaier</i>	101		
Microstructural origins of radiation-induced changes in mechanical properties of 316 L and 304 L austenitic stainless steels irradiated with mixed spectra of high- energy protons and spallation neutrons, <i>B.H. Sencer, G.M. Bond, M.L. Hamilton, F.A. Garner, S.A. Maloy and W.F. Sommer</i>	112		
The mechanical properties of 316L/304L stainless steels, Alloy 718 and Mod 9Cr–1Mo after irradiation in a spallation environment, <i>S.A. Maloy, M.R. James, G. Willcutt, W.F. Sommer, M. Sokolov, L.L. Snead, M.L. Hamilton and F. Garner</i>	119		
Tensile properties of candidate SNS target container materials after proton and neutron irradiation in the LANSCE accelerator, <i>K. Farrell and T.S. Byun</i>	129		
The mechanical properties of an Alloy 718 window after irradiation in a spallation environment, <i>M.R. James, S.A. Maloy, F.D. Gac, W.F. Sommer, J. Chen and H. Ullmaier</i>	139		
Correlation of radiation-induced changes in mechanical properties and microstructural development of Alloy 718 irradiated with mixed spectra of high-energy protons and spallation neutrons, <i>B.H. Sencer, G.M. Bond, F.A. Garner, M.L. Hamilton, S.A. Maloy and W.F. Sommer</i>	145		
Impact of irradiation on the tensile and fatigue prop- erties of two titanium alloys, <i>P. Marmy and T. Leguey</i>	155		
Retention of implanted hydrogen and helium in mar- tensitic stainless steels and their effects on mechanical properties, <i>P. Jung, C. Liu and J. Chen</i>	165		
Microstructure of both as-irradiated and deformed 304L stainless steel irradiated with 800 MeV protons, <i>Y. Dai, X. Jia, J.C. Chen, W.F. Sommer, M. Victoria and G.S. Bauer</i>	174		
Origin of hardening and deformation mechanisms in irradiated 316 LN austenitic stainless steel, <i>E.H. Lee, T.S. Byun, J.D. Hunn, K. Farrell and L.K. Mansur</i>	183		

Auger electron spectroscopy study of alloy 718 and 304L stainless steel irradiated with 800 MeV protons, <i>M. García-Mazarío, M. Hernández-Mayoral and A.M. Lancha</i>	192	Short-term static corrosion tests in lead–bismuth, <i>L. Soler Crespo, F.J. Martín Muñoz and D. Gómez Briceño</i>	273
Ion-irradiation-induced hardening in Inconel 718, <i>J.D. Hunn, E.H. Lee, T.S. Byun and L.K. Mansur</i>	203	Intergranular penetration and embrittlement of solid nickel through bismuth vapour condensation at 700°C, <i>N. Marié, K. Wolski and M. Biscondi</i>	282
Section 4. Liquid metal corrosion and embrittlement		Section 5. Liquid metal technology	
Thermal gradient mass transfer of type 316L stainless steel and alloy 718 in flowing mercury, <i>S.J. Pawel, J.R. DiStefano and E.T. Manneschildt</i>	210	Development of oxygen meters for the use in lead–bismuth, <i>J. Konys, H. Muscher, Z. Voß and O. Wedemeyer</i>	289
A study on martensitic and austenitic steels after exposure in mercury at 573 K up to 5000 h, <i>R.Kh. Zalavutdinov, Y. Dai, A.E. Gorodetsky, G.S. Bauer, V.Kh. Alimov and A.P. Zakharov</i>	219	Experimental setup for steel corrosion characterization in lead bath, <i>V. Ghetta, F. Gamaoun, J. Fouletier, M. Hénault and A. Lemoulec</i>	295
The effect of mercury on the fatigue behavior of 316 LN stainless steel, <i>J.P. Strizak, J.R. DiStefano, P.K. Liaw and H. Tian</i>	225	Kinetics of gas phase oxygen control system (OCS) for stagnant and flowing Pb–Bi Systems, <i>C.H. Lefhalm, J.U. Knebel and K.J. Mack</i>	301
Corrosion behavior of steels in flowing lead–bismuth, <i>F. Barbier and A. Rusanov</i>	231	Section 6. Material engineering	
Corrosion investigations of steels in flowing lead at 400°C and 550°C, <i>H. Glasbrenner, J. Konys, G. Mueller and A. Rusanov</i>	237	Monitoring of low-cycle fatigue degradation in X6CrNiTi18-10 austenitic steel, <i>M. Grosse, M. Nif-fenegger and D. Kalkhof</i>	305
Compatibility tests on steels in molten lead and lead–bismuth, <i>C. Fazio, G. Benamati, C. Martini and G. Palombarini</i>	243	Fabrication of a tantalum-clad tungsten target for KENS, <i>M. Kawai, K. Kikuchi, H. Kurishita, J.-F. Li and M. Furusaka</i>	312
Evaluation of the mechanical properties of T91 steel exposed to Pb and Pb–Bi at high temperature in controlled environment, <i>B. Schmidt, S. Guerin, J.-L. Pastol, P. Plandoux, J.-P. Dallas, C. Leroux and D. Gorse</i>	249	Summary	
Embrittlement of the martensitic steel 91 tested in liquid lead, <i>G. Nicaise, A. Legris, J.B. Vogt and J. Foct</i>	256	Summary of the Fourth International Workshop on Spallation Materials Technology (IWSMT-4), <i>G.S. Bauer, Y. Dai, S. Maloy, L.K. Mansur and H. Ullmaier</i>	321
Behaviour of F82H mod. stainless steel in lead–bismuth under temperature gradient, <i>D. Gómez Briceño, F.J. Martín Muñoz, L. Soler Crespo, F. Esteban and C. Torres</i>	265	Author index	327
		Subject index	330
