

Subject index

Absorber Materials

- Thermal conductivity of near-stoichiometric (U,Er)O₂ solid solutions, S.-H. Kim, Y.-G. Kim, H.-S. Kim, S.-H. Na, Y.-W. Lee and D.-S. Suhr 342 (2005) 119

Analytical Instruments and Methods (not listed elsewhere)

- Residual stress analysis in thick uranium films, A.M. Hodge, R.J. Foreman and G.F. Gallegos 342 (2005) 8
- The reaction of water on polycrystalline UO₂: Pathways to surface and bulk oxidation, S.D. Senanayake, R. Rousseau, D. Colegrave and H. Idriss 342 (2005) 179

Beryllium, Beryllium Alloys and Compounds

- Beryllium–tungsten mixed-material interactions, R.P. Doerner, M.J. Baldwin and R.A. Causey 342 (2005) 63

Carbon

- Bombardment of graphite with hydrogen isotopes: A model for the energy dependence of the chemical sputtering yield, C. Hopf and W. Jacob 342 (2005) 141

Cavities (includes Voids, Holes)

- Vacancy dislocation loops in zirconium and their interaction with self-interstitial atoms, D. Kulikov and M. Hou 342 (2005) 131

Ceramics (not listed elsewhere)

- Dual phase MgO–ZrO₂ ceramics for use in LWR inert matrix fuel, P.G. Medvedev, S.M. Frank, T.P. O'Holleran and M.K. Meyer 342 (2005) 48

Chemical Reactions (includes Electrochemical and Thermochemical Reactions)

- Oxidation kinetics of ZrNbO in steam: Differences between the pre- and post-transition stages, M. Tupin, M. Pijolat, F. Valdivieso and M. Soustelle 342 (2005) 108
- Bombardment of graphite with hydrogen isotopes: A model for the energy de-

- pendence of the chemical sputtering yield, C. Hopf and W. Jacob 342 (2005) 141
- The reaction of water on polycrystalline UO₂: Pathways to surface and bulk oxidation, S.D. Senanayake, R. Rousseau, D. Colegrave and H. Idriss 342 (2005) 179

Cladding Materials

- Oxidation kinetics of ZrNbO in steam: Differences between the pre- and post-transition stages, M. Tupin, M. Pijolat, F. Valdivieso and M. Soustelle 342 (2005) 108

Coatings and Coated Particles

- Residual stress analysis in thick uranium films, A.M. Hodge, R.J. Foreman and G.F. Gallegos 342 (2005) 8

Compatibility and Corrosion (includes Stress Corrosion Cracking)

- Beryllium–tungsten mixed-material interactions, R.P. Doerner, M.J. Baldwin and R.A. Causey 342 (2005) 63
- Erosion–corrosion of stainless steel pipes under two-phase flow with steam quality 26%, M.H. Koike 342 (2005) 125

Copper, Copper Alloys and Compounds

- Initiation and propagation of cleared channels in neutron-irradiated pure copper and a precipitation hardened CuCrZr alloy, D.J. Edwards, B.N. Singh and J.B. Bilde-Srensen 342 (2005) 164

Crystallographic Properties

- Thermal conductivity of near-stoichiometric (U,Er)O₂ solid solutions, S.-H. Kim, Y.-G. Kim, H.-S. Kim, S.-H. Na, Y.-W. Lee and D.-S. Suhr 342 (2005) 119

Defects and Defect Structures (excludes by Irradiation)

- Oxidation kinetics of ZrNbO in steam: Differences between the pre- and post-transition stages, M. Tupin, M. Pijolat, F. Valdivieso and M. Soustelle 342 (2005) 108

Deformation

- Residual stress analysis in thick uranium films, A.M. Hodge, R.J. Foreman and G.F. Gallegos 342 (2005) 8
- Initiation and propagation of cleared channels in neutron-irradiated pure copper and a precipitation hardened CuCrZr alloy, D.J. Edwards, B.N. Singh and J.B. Bilde-Srensen 342 (2005) 164

Dislocations

- Dislocation structures in 16MND5 pressure vessel steel strained in uniaxial tension, K. Obrtlík, C.F. Robertson and B. Marini 342 (2005) 35

Divertor Materials

- Limitations of W and W-1%La₂O₃ for use as structural materials, M. Rieth and B. Dafferner 342 (2005) 20

Electron Microscopy

- Dislocation structures in 16MND5 pressure vessel steel strained in uniaxial tension, K. Obrtlík, C.F. Robertson and B. Marini 342 (2005) 35
- On the correlation between mechanical and TEM studies of the aging of palladium during tritium storage, A. Fabre, B. Decamps, E. Finot, J.M. Penisson, J. Demoment, S. Thiebaut, S. Contreras and A. Percheron-Guegan 342 (2005) 101

Experimental Techniques

- On the correlation between mechanical and TEM studies of the aging of palladium during tritium storage, A. Fabre, B. Decamps, E. Finot, J.M. Penisson, J. Demoment, S. Thiebaut, S. Contreras and A. Percheron-Guegan 342 (2005) 101

Fatigue

- Effect of the fabrication process on fatigue performance of U₃Si₂ fuel plate with sandwich structure, X.-S. Wang, S.-S. Li, Q.-Y. Wang and Y. Xu 342 (2005) 42

Fuels and Fuel Elements

- Effect of the fabrication process on fatigue performance of U₃Si₂ fuel plate with sandwich structure, X.-S. Wang, S.-S. Li, Q.-Y. Wang and Y. Xu 342 (2005) 42
- Dual phase MgO-ZrO₂ ceramics for use in LWR inert matrix fuel, P.G. Medvedev, S.M. Frank, T.P. O'Holleran and M.K. Meyer 342 (2005) 48
- The reaction of water on polycrystalline UO₂: Pathways to surface and bulk

- oxidation, S.D. Senanayake, R. Rousseau, D. Colegrave and H. Idriss 342 (2005) 179

Ion Irradiation

- Bombardment of graphite with hydrogen isotopes: A model for the energy dependence of the chemical sputtering yield, C. Hopf and W. Jacob 342 (2005) 141

Kinetics

- Oxidation kinetics of ZrNbO in steam: Differences between the pre- and post-transition stages, M. Tupin, M. Pijolat, F. Valdivieso and M. Soustelle 342 (2005) 108

Liquid Metals

- Dynamics of high-temperature oxidation accompanied by scale removal and implications for technological applications, J. Zhang, N. Li and Y. Chen 342 (2005) 1

Mechanical Properties (not listed elsewhere)

- Limitations of W and W-1%La₂O₃ for use as structural materials, M. Rieth and B. Dafferner 342 (2005) 20
- On the correlation between mechanical and TEM studies of the aging of palladium during tritium storage, A. Fabre, B. Decamps, E. Finot, J.M. Penisson, J. Demoment, S. Thiebaut, S. Contreras and A. Percheron-Guegan 342 (2005) 101

Metals, Alloys and Compounds (not listed elsewhere)

- Analysis of controversial zones of the Zr-Cr equilibrium diagram, R.O. González and L.M. Griboaud 342 (2005) 14
- Neutron displacement cross-sections for tantalum and tungsten at energies up to 1GeV, C.H.M. Broeders, A.Yu. Konobeyev and C. Villagrasa 342 (2005) 68

Neutron Irradiation

- Microstructural behavior of VVER-440 reactor pressure vessel steels under irradiation to neutron fluences beyond the design operation period, E.A. Kuleshova, B.A. Gurovich, Ya.I. Shtrombakh, Yu.A. Nikolaev and V.A. Pechenkin 342 (2005) 77
- Initiation and propagation of cleared channels in neutron-irradiated pure copper and a precipitation hardened CuCrZr alloy, D.J. Edwards, B.N. Singh and J.B. Bilde-Srensen 342 (2005) 164

Nuclear Properties

- Neutron displacement cross-sections for tantalum and tungsten at energies up to 1GeV, C.H.M. Broeders, A.Yu. Konobeyev and C. Villagrasa 342 (2005) 68

- Phase Equilibria** (*includes Constitution, Phase Stability, Phase Instability*)
 Analysis of controversial zones of the Zr–Cr equilibrium diagram, R.O. González and L.M. Gribaudo 342 (2005) 14
- Phase Transformation** (*includes Evaporation, Sublimation*)
 Beryllium–tungsten mixed-material interactions, R.P. Doerner, M.J. Baldwin and R.A. Causey 342 (2005) 63
 Melting of stoichiometric and hyperstoichiometric uranium dioxide, D. Manara, C. Ronchi, M. Sheindlin, M. Lewis and M. Brykin 342 (2005) 148
- Plasma-Materials Interaction**
 Beryllium–tungsten mixed-material interactions, R.P. Doerner, M.J. Baldwin and R.A. Causey 342 (2005) 63
 Bombardment of graphite with hydrogen isotopes: A model for the energy dependence of the chemical sputtering yield, C. Hopf and W. Jacob 342 (2005) 141
- Pressure Vessel Materials**
 Microstructural behavior of VVER-440 reactor pressure vessel steels under irradiation to neutron fluences beyond the design operation period, E.A. Kuleshova, B.A. Gurovich, Ya.I. Shtrombakh, Yu.A. Nikolaev and V.A. Pechenkin 342 (2005) 77
- Processing**
 Effect of the fabrication process on fatigue performance of U_3Si_2 fuel plate with sandwich structure, X.-S. Wang, S.-S. Li, Q.-Y. Wang and Y. Xu 342 (2005) 42
 Dual phase MgO–ZrO₂ ceramics for use in LWR inert matrix fuel, P.G. Medvedev, S.M. Frank, T.P. O'Holleran and M.K. Meyer 342 (2005) 48
 Thermal conductivity of near-stoichiometric (U,Er)O₂ solid solutions, S.-H. Kim, Y.-G. Kim, H.-S. Kim, S.-H. Na, Y.-W. Lee and D.-S. Suhr 342 (2005) 119
- Proton Irradiation**
 Swelling and radiation-induced segregation in austenitic alloys, T.R. Allen, J.I. Cole, J. Gan, G.S. Was, R. Dropek and E.A. Kenik 342 (2005) 90
- Radiation Effects: Atomic Defects**
 Void concentration for heterogeneous microstructure development in annealed metals, A.A. Semenov and C.H. Woo 342 (2005) 188
- Radiation Effects: Extended Defects, Microstructures**
 Microstructural behavior of VVER-440 reactor pressure vessel steels under irradiation to neutron fluences beyond the design operation period, E.A. Kuleshova, B.A. Gurovich, Ya.I. Shtrombakh, Yu.A. Nikolaev and V.A. Pechenkin 342 (2005) 77
 Swelling and radiation-induced segregation in austenitic alloys, T.R. Allen, J.I. Cole, J. Gan, G.S. Was, R. Dropek and E.A. Kenik 342 (2005) 90
 Void concentration for heterogeneous microstructure development in annealed metals, A.A. Semenov and C.H. Woo 342 (2005) 188
- Radiation Effects: Mechanical Properties**
 Microstructural behavior of VVER-440 reactor pressure vessel steels under irradiation to neutron fluences beyond the design operation period, E.A. Kuleshova, B.A. Gurovich, Ya.I. Shtrombakh, Yu.A. Nikolaev and V.A. Pechenkin 342 (2005) 77
 Initiation and propagation of cleared channels in neutron-irradiated pure copper and a precipitation hardened CuCrZr alloy, D.J. Edwards, B.N. Singh and J.B. Bilde-Srensen 342 (2005) 164
- Rare Earths**
 Void concentration for heterogeneous microstructure development in annealed metals, A.A. Semenov and C.H. Woo 342 (2005) 188
- Segregation**
 Swelling and radiation-induced segregation in austenitic alloys, T.R. Allen, J.I. Cole, J. Gan, G.S. Was, R. Dropek and E.A. Kenik 342 (2005) 90
- Silicon and Silicon Compounds**
 Effect of the fabrication process on fatigue performance of U_3Si_2 fuel plate with sandwich structure, X.-S. Wang, S.-S. Li, Q.-Y. Wang and Y. Xu 342 (2005) 42
- Steels, Austenitic**
 Dynamics of high-temperature oxidation accompanied by scale removal and implications for technological applications, J. Zhang, N. Li and Y. Chen 342 (2005) 1
 Swelling and radiation-induced segregation in austenitic alloys, T.R. Allen, J.I. Cole, J. Gan, G.S. Was, R. Dropek and E.A. Kenik 342 (2005) 90
 Erosion–corrosion of stainless steel pipes under two-phase flow with steam quality 26%, M.H. Koike 342 (2005) 125

Steels, Ferritic, Pressure Vessel

- Dislocation structures in 16MND5 pressure vessel steel strained in uniaxial tension, K. Obrtlík, C.F. Robertson and B. Marini 342 (2005) 35
- Microstructural behavior of VVER-440 reactor pressure vessel steels under irradiation to neutron fluences beyond the design operation period, E.A. Kuleshova, B.A. Gurovich, Ya.I. Shtrombakh, Yu.A. Nikolaev and V.A. Pechenkin 342 (2005) 77

Surface Effects

- Erosion–corrosion of stainless steel pipes under two-phase flow with steam quality 26%, M.H. Koike 342 (2005) 125
- Bombardment of graphite with hydrogen isotopes: A model for the energy dependence of the chemical sputtering yield, C. Hopf and W. Jacob 342 (2005) 141
- The reaction of water on polycrystalline UO_2 : Pathways to surface and bulk oxidation, S.D. Senanayake, R. Rousseau, D. Colegrave and H. Idriss 342 (2005) 179

Swelling: Metals and Alloys

- Swelling and radiation-induced segregation in austenitic alloys, T.R. Allen, J.I. Cole, J. Gan, G.S. Was, R. Dropek and E.A. Kenik 342 (2005) 90

Theory and Modelling

- Dynamics of high-temperature oxidation accompanied by scale removal and implications for technological applications, J. Zhang, N. Li and Y. Chen 342 (2005) 1
- Bombardment of graphite with hydrogen isotopes: A model for the energy dependence of the chemical sputtering yield, C. Hopf and W. Jacob 342 (2005) 141

Thermal Reactor Materials

- Dual phase MgO-ZrO_2 ceramics for use in LWR inert matrix fuel, P.G. Medvedev, S.M. Frank, T.P. O'Holleran and M.K. Meyer 342 (2005) 48
- Erosion–corrosion of stainless steel pipes under two-phase flow with steam quality 26%, M.H. Koike 342 (2005) 125

Thermophysical Properties

- Thermal conductivity of near-stoichiometric $(\text{U,Er})\text{O}_2$ solid solutions, S.-H. Kim, Y.-G. Kim, H.-S. Kim, S.-H. Na, Y.-W. Lee and D.-S. Suhr 342 (2005) 119
- The thermal conductivity and lattice parameter measurements in a low Ce content $(\text{U}_{1-x}\text{Ce}_x)\text{O}_2$ mixed oxide, D.-J. Kim, Y.-W. Lee and Y.-S. Kim 342 (2005) 192

Tritium and Tritides

- On the correlation between mechanical and TEM studies of the aging of palladium during tritium storage, A. Fabre, B. Decamps, E. Finot, J.M. Penisson, J. Demoment, S. Thiebaut, S. Contreras and A. Percheron-Guegan 342 (2005) 101

Tungsten, Tungsten Alloys and Compounds

- Limitations of W and $\text{W-1\%La}_2\text{O}_3$ for use as structural materials, M. Rieth and B. Dafferner 342 (2005) 20
- Beryllium–tungsten mixed-material interactions, R.P. Doerner, M.J. Baldwin and R.A. Causey 342 (2005) 63
- Neutron displacement cross-sections for tantalum and tungsten at energies up to 1 GeV, C.H.M. Broeders, A.Yu. Konobeyev and C. Villagrasa 342 (2005) 68

Uranium, Uranium Alloys

- Residual stress analysis in thick uranium films, A.M. Hodge, R.J. Foreman and G.F. Gallegos 342 (2005) 8

Uranium Oxides and Compounds

- Effect of the fabrication process on fatigue performance of U_3Si_2 fuel plate with sandwich structure, X.-S. Wang, S.-S. Li, Q.-Y. Wang and Y. Xu 342 (2005) 42
- Thermal conductivity of near-stoichiometric $(\text{U,Er})\text{O}_2$ solid solutions, S.-H. Kim, Y.-G. Kim, H.-S. Kim, S.-H. Na, Y.-W. Lee and D.-S. Suhr 342 (2005) 119
- Melting of stoichiometric and hyperstoichiometric uranium dioxide, D. Manara, C. Ronchi, M. Sheindlin, M. Lewis and M. Brykin 342 (2005) 148
- The reaction of water on polycrystalline UO_2 : Pathways to surface and bulk oxidation, S.D. Senanayake, R. Rousseau, D. Colegrave and H. Idriss 342 (2005) 179

Waste: Behavior in Storage

- Protective properties and dissolution ability of the gel formed during nuclear glass alteration, D. Rebecoul, P. Frugier, S. Gin and A. Ayrat 342 (2005) 26

Zirconium, Zirconium Alloys

- Analysis of controversial zones of the Zr–Cr equilibrium diagram, R.O. González and L.M. Gribaudo 342 (2005) 14
- Oxidation kinetics of ZrNbO in steam: Differences between the pre- and post-transition stages, M. Tupin, M. Pijolat, F. Valdivieso and M. Soustelle 342 (2005) 108
- Vacancy dislocation loops in zirconium and their interaction with self-interstitial atoms, D. Kulikov and M. Hou 342 (2005) 131
