

Contents

Proceedings of the Symposium on Space Reactor Fuels and Materials held in conjunction with the 2006 Annual Meeting of The Minerals, Metals, and Materials Society (TMS)

Contents	v		
Preface	vii		
Section 1. Fuels			
Kinetics of precipitation of U_4O_9 from hyperstoichiometric UO_{2+x} , <i>J.D. Higgs, W.T. Thompson, B.J. Lewis and S.C. Vogel</i>	297	Microstructural and mechanical property changes in the Ta-base T-111 alloy following thermal aging, <i>K.J. Leonard, J.T. Busby and S.J. Zinkle</i>	353
Effect of sintering conditions on the microstructure and mechanical properties of ZrN as a surrogate for actinide nitride fuels, <i>K. Wheeler, P. Peralta, M. Parra, K. McClellan, J. Dunwoody and G. Egeland</i>	306	Microstructural and mechanical property changes with aging of Mo-41Re and Mo-47.5Re alloys, <i>K.J. Leonard, J.T. Busby and S.J. Zinkle</i>	369
Literature review of thermal and radiation performance parameters for high-temperature, uranium dioxide fueled cermet materials, <i>C. Haertling and R.J. Hanrahan Jr.</i>	317	Radiation-damage in molybdenum-rhenium alloys for space reactor applications, <i>J.T. Busby, K.J. Leonard and S.J. Zinkle</i>	388
Section 2. Environmental effects on materials			
Aging effects on microstructural and mechanical properties of select refractory metal alloys for space-reactor applications, <i>K.J. Leonard, J.T. Busby and S.J. Zinkle</i>	336	Section 3. Refractory alloy development and welding	
		Alloying and microstructure stability in the high-temperature Mo-Si-B system, <i>R. Sakidja and J.H. Perepezko</i>	407
		Optimization of resistance spot welding on the assembly of refractory alloy 50Mo-50Re thin sheet, <i>J. Xu, X. Jiang, Q. Zeng, T. Zhai, T. Leonhardt, J. Farrell, W. Umstead and M.P. Effgen</i>	417
