Proceedings of the International Conference on Advances in Nuclear Materials: Processing, Performance and Phenomena

Preface	xi	Utilisation of thorium in reactors, <i>K. Anantharaman, V. Shivakumar and D. Saha</i>	119
1. Materials performance in pressurized heavy water reactors		5. Post irradiation examination	
Materials performance in CANDU reactors: The first 30 years and the prognosis for life extension and new designs, <i>R.L. Tapping</i>	1	Behaviour of irradiated PHWR fuel pins during high temperature heating, <i>U.K. Viswanathan, K. Unnikrishnan, P. Mishra, S. Banerjee, S. Anantharaman and D.N. Sah</i>	122
Manufacturing variability and deformation for Zr-2.5Nb pressure tubes, <i>G.A. Bickel and M. Griffiths</i>	9	Post irradiation examination of reactor operated pressure tube S-07 of KAPS-2, <i>D.N. Sah, E. Ramadasan, K. Unnikrishnan, J.L. Singh, P.M. Ouseph, B.N. Rath, H.N. Singh, P.B. Kondejkar, V.D. Alur, S. Banerjee, R.S. Shrivastaw, P. Mishra, V.P. Jathar, N. Kumawat and M.P. Dhotre</i>	128
Fitness for service assessment of coolant channels of Indian PHWRs, <i>R.K. Sinha, S.K. Sinha and K. Madhusoodanan</i>	14	A study of the effect of titanium on the void swelling behavior of D9 steels by ion beam simulation, <i>C. David, B.K. Panigrahi, S. Balaji, A.K. Balamurugan, K.G.M. Nair, G. Amarendra, C.S. Sundar and B. Raj</i>	132
In-reactor performance of pressure tubes in CANDU reactors, <i>D.K. Rodgers, C.E. Coleman, M. Griffiths, G.A. Bickel, J.R. Theaker, I. Muir, A.A. Bahurmuz, S. St. Lawrence and M. Resta Levi</i>	22	6. Fuel performance modelling	
The transformation behaviour of the β -phase in Zr-2.5Nb pressure tubes, <i>M. Griffiths, J.E. Winegar and A. Buyers</i>	28	Extending the application range of a fuel performance code from normal operating to design basis accident conditions, <i>P. Van Uffelen, C. Györi, A. Schubert, J. van de Laar, Z. Hózer and G. Spykman</i>	137
Microchemical study of high-burnup CANDU [®] fuel by imaging-XPS, <i>T. Do, K.G. Irving and W.H. Hocking</i>	34	Blind prediction exercise on modeling of PHWR fuel at extended burnup, <i>D.N. Sah, U.K. Viswanathan, C.S. Viswanadham, K. Unnikrishnan and B.N. Rath</i>	144
Nuclear fuel performance: Trends, remedies and challenges, <i>C.A. Rusch</i>	41	Derivation of fuel bundle power limits using fuel element modelling code FUDA, <i>P.N. Prasad, R. Soni, R.M. Tripathi, P.R. Pandarinathan and L.K. Neema</i>	150
Post irradiation examination of thermal reactor fuels, <i>D.N. Sah, U.K. Viswanathan, E. Ramadasan, K. Unnikrishnan and S. Anantharaman</i>	45	7. Zirconium alloys	
2. Pressurized heavy water reactor fuel		Microstructural evolution in zirconium based alloys, <i>R. Tewari, D. Srivastava, G.K. Dey, J.K. Chakravarty and S. Banerjee</i>	153
Advanced fuel cycles for use in PHWRs, <i>H.P. Gupta, S.V.G. Menon and S. Banerjee</i>	54	Ageing of zirconium alloy components, <i>S. Chatterjee, P.K. Shah and J.S. Dubey</i>	172
Fabrication of seamless calandria tubes by cold pilgering route using 3-pass and 2-pass schedules, <i>N. Saibaba</i>	63	Optimization of stress relief heat treatment of PHWR pressure tubes (Zr-2.5Nb alloy), <i>G. Choudhuri, D. Srivastava, K.R. Gurumurthy and B.K. Shah</i>	178
Texture and hydride orientation relationship of Zircaloy-4 fuel clad tube during its fabrication for pressurized heavy water reactors, <i>K. Vaibhav, S.V.R. Rao, S.K. Jha, N. Saibaba and R.N. Jayaraj</i>	71	8. Advanced materials and next generation reactors	
Microstructural and textural developments during Zircaloy-4 fuel tube fabrication, <i>K.V.M. Krishna, S.K. Sahoo, I. Samajdar, S. Neogy, R. Tewari, D. Srivastava, G.K. Dey, G.H. Das, N. Saibaba and S. Banerjee</i>	78	High temperature reactors, <i>I.V. Dulera and R.K. Sinha</i>	183
3. Corrosion		Structural materials for Gen-IV nuclear reactors: Challenges and opportunities, <i>K.L. Murty and I. Charit</i>	189
Flow accelerated corrosion and its control measures for the secondary circuit pipelines in Indian nuclear power plants, <i>V. Kain, S. Roychowdhury, T. Mathew and A. Bhandakkar</i>	86	Development of powder metallurgy technique for synthesis of U ₃ Si ₂ dispersoid, <i>V.P. Sinha, G.P. Mishra, S. Pal, K.B. Khan, P.V. Hegde and G.J. Prasad</i>	196
Some fundamental aspects of thermally activated processes involved in stress corrosion cracking in high temperature aqueous environments, <i>Z. Lu, Y. Takeda and T. Shoji</i>	92		
IGSCC of non-sensitized stainless steels in high temperature water, <i>P.L. Andresen and M.M. Morra</i>	97		
4. Plutonium and thorium bearing fuels			
Properties of plutonium and its alloys for use as fast reactor fuels, <i>S.S. Hecker and M. Stan</i>	112
