Proceedings of the Twelfth Symposium on Thermochemistry and Thermophysics of Nuclear Materials

Editorial: Preface STTNM-2008	viii	Electrochemical transient techniques for study of the electro-chemistry and thermodynamics of nuclear materials in molten salts, S.A. Kuznetsov and M. Gaune-Escard	108
Kubaschewski Lecture			
Nuclear fuels – Present and future, D. Olander	1	Thermal and mechanical properties of (U,Er)O ₂ , S. Yamanaka, K. Kurosaki, M. Katayama, J. Adachi, M. Uno, T. Kuroishi and M. Yamasaki	115
Keynote Lecture			
Thermochemical and thermophysical properties of minor actinide compounds, K. Minato, M. Takano, H. Otake, T. Nishi, M. Akabori and Y. Arai	23	Computer simulation of defects formation and equilibrium in non-stoichiometric uranium dioxide, E. Yakub, C. Ronchi and D. Staicu	119
Over forty years of ‘Thermodynamics of Nuclear Materials’, P.E. Potter	29	The terminal solid solubility of hydrogen in irradiated Zircaloy-2 and microscopic modeling of hydride behavior, K. Une, S. Ishimoto, Y. Etoh, K. Ito, K. Ogata, T. Baba, K. Kamimura and Y. Kobayashi	127
Thermophysical properties of NpO ₂ , AmO ₂ and CmO ₂ , V. Sobolev	45	New aspects about reduced LCF-life time of spherical ductile cast iron due to dynamic strain aging at intermediate temperatures, H. Mouri, W. Wunderlich and M. Hayashi	137
Eutectic crystallization in the FeO _{1.5} –UO _{2+x} –ZrO ₂ system, V.I. Almjashv, M. Barrachin, S.V. Bechta, D. Bottomley, F. Defoort, M. Fischer, V.V. Gusarov, S. Hellmann, V.B. Khabensky, E.V. Krushinov, D.B. Lopukh, L.P. Mezentseva, A. Miasoedov, Yu.B. Petrov and S.A. Vitol	52	Phosphates behaviours in conversion of FP chlorides, I. Amamoto, H. Kofuji, M. Myochin, Y. Takasaki and T. Terai	142
NaTaO ₃ composite ceramics – A new thermoelectric material for energy generation, W. Wunderlich	57	Evaluation of melting point of UO ₂ by molecular dynamics simulation, T. Arima, K. Idemitsu, Y. Inagaki, Y. Tsujita, M. Kinoshita and E. Yakub	149
Monitoring the embrittlement of reactor pressure vessel steels by using the Seebeck coefficient, M. Niffenegger and H.J. Leber	62	Thermophysical properties of (U,Y)O ₂ , H. Gima, K. Kurosaki, J. Adachi, M. Katayama, H. Muta, M. Uno and S. Yamanaka	155
Oxygen potential measurements of Am _{0.5} Pu _{0.5} O _{2-x} by EMF method, H. Otake, M. Akabori and Y. Arai	68	Crystal structure and magnetic properties of UFe ₅ Ga ₇ , M.S. Henriques, P. Mora, M.M. Cruz, H. Noël, O. Tougait, V.H. Tran and A.P. Gonçalves	160
Estimation of oxygen potential for U–Pu–O mixed oxide fuel, S. Vana Varamban, V. Ganesan and P.R. Vasudeva Rao	72	Analysis of oxygen potential of (U _{0.7} Pu _{0.3})O _{2±x} and (U _{0.8} Pu _{0.2})O _{2±x} based on point defect chemistry, M. Kato, K. Konashi and N. Nakae	164
Radial redistribution of actinides in irradiated FR-MOX fuels, K. Maeda, S. Sasaki, M. Kato and Y. Kihara	78	Fabrication and mechanical characterization of zirconium and gadolinium hydrides, Y. Kitano, K. Kurosaki, M. Ito, H. Muta, M. Uno, K. Konashi and S. Yamanaka	170
Effect of Nd and Pr addition on the thermal and mechanical properties of (U,Ce)O ₂ , K. Kurosaki, K. Tanaka, M. Osaka, H. Muta, M. Uno and S. Yamanaka	85	Evaluation of phosphate thermodynamic properties for spent electrolyte recycle, H. Kofuji, I. Amamoto, M. Yasumoto, K. Sasaki, M. Myochin and T. Terai	173
Thermal expansion of TRU nitride solid solutions as fuel materials for transmutation of minor actinides, M. Takano, M. Akabori, Y. Arai and K. Minato	89	Thermal conductivity of (U,Pu,Np)O ₂ solid solutions, K. Morimoto, M. Kato, M. Ogasawara and M. Kashimura	179
Phase relations in the U–Mo–Al ternary system, H. Noël, O. Tougait and S. Dubois	93	Thermophysical properties of several nitrides prepared by spark plasma sintering, H. Muta, K. Kurosaki, M. Uno and S. Yamanaka	186
Thermoelectric power studies of ferromagnet U ₂ ScB ₆ C ₃ , V.H. Tran, W. Miiller and P. Rogl	98	The phase state at high temperatures in the MOX–SiO ₂ system, S. Nakamichi, M. Kato, T. Sunaoshi, T. Uchida, K. Morimoto, M. Kashimura and Y. Kihara	191
Thermodynamic study of the U–Si system, A. Berche, C. Rado, O. Rapaud, C. Guéneau and J. Rogez	101
