## Proceedings of the Ninth International Workshop on Spallation Materials Technology (IWSMT-9)

Preface.....	ix	Radiation damage/activity calculation for CSNS target station, <i>W. Yin, T.J. Liang, Q.Z. Yu and X.J. Jia</i>	100
<b>Keynote</b>			
Role of nuclear energy to a future society of shortage of energy resources and global warming, <i>S. Saito</i>	1		
<b>Spallation source – Operation and development</b>			
SNS October 2008 status, <i>T. McManamy</i>	10		
Status of J-PARC project, <i>Y. Oyama</i>	15		
Overview on spallation target design concepts and related materials issues, <i>G.S. Bauer</i>	19		
Mock-up stands for a rotating target for CSNS project, <i>X.J. Jia, G.S. Bauer, W. He, Y.L. Sun, T.J. Liang, W. Yin and D. Zhao</i>	28		
3 MW solid rotating target design, <i>T. McManamy, M. Rennich, F. Gallmeier, P. Ferguson and J. Janney</i>	35		
<b>Radiation damage and material development</b>			
The microstructure and tensile properties of ferritic/martensitic steels T91, Eurofer-97 and F82H irradiated up to 20 dpa in STIP-III, <i>Z. Tong and Y. Dai</i>	43		
Proton irradiation effects on tensile and bend-fatigue properties of welded F82H specimens, <i>S. Saito, K. Kikuchi, D. Hamaguchi, K. Usami, A. Ishikawa, Y. Nishino, S. Endo, M. Kawai and Y. Dai</i>	49		
Mechanical properties and microstructural stability of 11Cr-ferritic/martensitic steel cladding under irradiation, <i>Y. Yano, S. Yamashita, S. Ohtsuka, T. Kaito, N. Akasaka, T. Shibayama, S. Watanabe and H. Takahashi</i>	59		
Reduction method of DBTT shift due to irradiation for reduced-activation ferritic/martensitic steels, <i>E. Wakai, N. Okubo, M. Ando, T. Yamamoto and F. Takada</i>	64		
TWIN ASTIR: First tensile results of T91 and 316L steel after neutron irradiation in contact with liquid lead–bismuth eutectic, <i>J. Van den Bosch, G. Coen, R.W. Bosch and A. Almazouzi</i>	68		
Post-irradiation examination of the Spallation Neutron Source target module, <i>D.A. McClintock, P.D. Ferguson and L.K. Mansur</i>	73		
Effect of hydrogen ion/electron dual-beam irradiation on microstructural damage of a 12Cr-ODS ferrite steel, <i>Y. Zhanbing, H. Benfu, H. Kinoshita, H. Takahashi and S. Watanabe</i>	81		
Development of re-crystallized W–1.1%TiC with enhanced room-temperature ductility and radiation performance, <i>H. Kurishita, S. Matsuo, H. Arakawa, T. Sakamoto, S. Kobayashi, K. Nakai, T. Takida, M. Kato, M. Kawai and N. Yoshida</i>	87		
<b>Modeling and simulation of radiation damage in materials</b>			
Study on low activation decoupler material for MW-class spallation neutron sources, <i>M. Harada, M. Teshigawara, F. Maekawa and M. Futakawa</i>	93		
		Radiation damage/activity calculation for CSNS target station, <i>W. Yin, T.J. Liang, Q.Z. Yu and X.J. Jia</i>	100
		<b>Lead-bismuth eutectic corrosion and embrittlement</b>	
		Ni-rich precipitates in a lead bismuth eutectic loop, <i>K. Kikuchi, S. Saito, D. Hamaguchi and M. Tezuka</i>	104
		Oxidation behaviour of P122 and a 9Cr–2W ODS steel at 550 °C in oxygen-containing flowing lead–bismuth eutectic, <i>C. Schroer, J. Konyts, T. Furukawa and K. Aoto</i>	109
		Liquid metal embrittlement of silicon enriched steel for nuclear applications, <i>J. Van den Bosch, P. Hosemann, A. Almazouzi and S.A. Maloy</i>	116
		Investigation of the effect of lead–bismuth eutectic on the fracture properties of T91 and 316L, <i>G. Coen, J. Van den Bosch, A. Almazouzi and J. Degriek</i>	122
		Study on phase transition of Pb–Bi eutectic alloy by neutron transmission spectroscopy, <i>O. Takada, T. Kamiyama and Y. Kiyonagi</i>	129
		Corrosion resistance of Al-alloying high Cr–ODS steels in stagnant lead–bismuth, <i>S. Takaya, T. Furukawa, M. Inoue, T. Fujisawa, T. Okuda, F. Abe, S. Ohnuki and A. Kimura</i>	132
		Corrosion characteristics of materials in Pb–Bi under transient temperature conditions, <i>A.K. Rivai and M. Takahashi</i>	139
		Corrosion investigations of Al–Fe-coated steels, high Cr steels, refractory metals and ceramics in lead alloys at 700 °C, <i>A.K. Rivai and M. Takahashi</i>	146
		A stability of oxide layers formed in LBE on HCM12A to external loading, <i>E. Yamaki and K. Kikuchi</i>	153
		Investigations of a zirconia solid electrolyte oxygen sensor in liquid lead, <i>A.K. Rivai and M. Takahashi</i>	160
		Characterization and re-activation of oxygen sensors for use in liquid lead–bismuth, <i>Y. Kurata, Y. Abe, M. Futakawa and H. Oigawa</i>	165
		Analysis of corrosion scale structure of pre-oxidized stainless steel 316 in molten lead bismuth eutectic and the relation to impedance spectroscopy response, <i>X. Chen, J.F. Stubbins, P. Hosemann and A.M. Bolind</i>	172
		<b>Cavitation erosion and pitting</b>	
		Preliminary evaluation of cavitation–erosion resistance of Ti-alloys in mercury for the Spallation Neutron Source, <i>S.J. Pawel and L.K. Mansur</i>	180
		Solubility of helium in mercury for bubbling technology of the spallation neutron mercury target, <i>S. Hasegawa, T. Naoe and M. Futakawa</i>	189
		Double-layer-coated stainless steel plates resistant to pitting damage, <i>M. Kawai, M. Futakawa, T. Naoe, T. Yamamura and T. Igarashi</i>	193
		Effect of tensile stress on cavitation damage formation in mercury, <i>T. Naoe, H. Kogawa, Y. Yamaguchi and M. Futakawa</i>	199
		Cavitation damage experiments for mercury spallation targets at the LANSCE – WNR in 2008, <i>B.W. Riemer, M.W. Wendel and D.K. Felde</i>	207

Temperature and particle size effects on flow localization of 9–12%Cr ferritic/martensitic steel by <i>in situ</i> X-ray diffraction and small angle scattering, <i>X. Pan, X. Wu, X. Chen, K. Mo, J. Almer, D.R. Haeffner and J.F. Stubbins</i>	220	Development of JSNS target vessel diagnosis system using laser Doppler method, <i>M. Teshigawara, T. Wakui, T. Naoe, H. Kogawa, F. Maekawa, M. Futakawa and K. Kikuchi</i>	238
Defect structures in nickel and SUS304SS formed by the collapse of cavitation bubbles, <i>T. Yoshiie, K. Sato, Q. Xu, M. Komatsu, M. Futakawa, T. Naoe and M. Kawai</i>	227	Multiwalled carbon nanotube-reinforced ceramic matrix composites as a promising structural material, <i>M. Estili, H. Kwon, A. Kawasaki, S. Cho, K. Takagi, K. Kikuchi and M. Kawai</i>	244
<b>Neutronics assessment and target design</b>		Investigation of beam window buckling with consideration of irradiation effects for conceptual ADS design, <i>T. Sugawara, K. Kikuchi, K. Nishihara and H. Oigawa</i>	246
Observed changes in electrical materials properties of ZrO <sub>2</sub> in Megapie leak detectors during irradiation, <i>K. Thomsen</i>	232
