

CURRENT TRENDS IN ORGANOMETALLIC CHEMISTRY

A Symposium held at the University of Cincinnati,

June 12-15, 1963

In June 1963, approximately 120 people representing many major centers of organometallic chemistry in the world met in Cincinnati for a Symposium on Current Trends in Organometallic Chemistry. The program was co-sponsored by the U.S. Army Research Office (Durham), the Petroleum Research Fund of the American Chemical Society, and the University of Cincinnati.

Fifty-five percent of the attendees were from academic institutions and forty-five percent from industry and government. Nine countries were represented: Belgium, Canada, England, France, Germany, Holland, Italy, Japan, and the United States. Twenty-one people were from outside the continental United States. The next international Symposium of Organometallic Chemistry in this series will be held in September 1965 at the University of Wisconsin.

For the information of the readers of the *Journal of Organometallic Chemistry*, the titles, authors, and affiliations of the work presented at the Cincinnati Symposium are listed below. Although complete abstracts of the papers are no longer available, information concerning any particular paper may be obtained from the appropriate author.

RAYMOND E. DESSY
HENRY GILMAN

J. Organometal. Chem., 1 (1964) 205-207

- RAYMOND E. DESSY, *University of Cincinnati*, Introduction
- HENRY GILMAN, *Iowa State University*, The growth of Organometallic Chemistry
- ROLAND KOSTER, *Max Planck Institute, Mulheim, Ruhr (Germany)*, New results in the field of organoboron compounds
- FREDERICK HAWTHORNE*, RICHARD L. PILLING, RUSSEL N. GRIMES AND PETER STOKELY, *The University of California, Riverside, California*, Recent mechanism studies with $B_{10}H_{14}$ derivatives
- M. F. LAPPERT* AND B. PROKAI, *The Manchester College of Science and Technology, University of Manchester (England)*, Chloraboration and allied reactions of acetylenes
- DONALD S. MATTESON, *Washington State University, Pullman, Washington*, Electrophilic additions to α,β -unsaturated boronic esters
- KURT NIEDENZU, *U.S. Army Research Office, Durham, North Carolina*, Reaction of some amino-silanes with boron derivatives
- THOMAS P. ONAK, *Los Angeles State College, Los Angeles, California*, AND ROBERT E. WILLIAMS, *Space General Corporation, El Monte, California*, Synthesis of carboranes from dihydro-carboranes
