tincts (0.06 et 0.12 alors que le groupe CH_2 se situe à 1.42).

Announcement

A Discussion Group of the Dalton Division of the Chemical Society has been set up to cover the field of the Chemistry of Silicon, Germanium, Tin and Lead. The first meeting will be held at Westfield College, London on Friday, 7th April, 1978 when the principal lecturers will be Professors M. Pereyre (Bordeaux), and M. Onyszchuk (McGill, Montreal). Further details may be obtained from the Secretary, Dr. P.G. Harrison, Department of Chemistry, University of Nottingham, University Park, Nottingham, NG7 2RD (Great Britain).
