

interest to some readers of this journal, especially the brief section on P-, Si-, Ge-, Sn- and Se-centred radicals. Other chapters deal with the solution chemistry of aryl nitrenes (E.F.V. Scriven), nitrile ylides and nitrenes from 2H-azirines (A. Padua and P.H.J. Carlsen); five-membered hetarynes (M.G. Reinecke), and the mechanisms of Favorskii rearrangements (A. Baretta and B. Waegell).
