Steric effects of phosphine ligands on the photochemistry of $\text{Mn}_2(\text{CO})_{10}$; by C. Busetto, A.M. Mattucci, E.M. Cernia and R. Bertani (*J. Organomet. Chem.*, 246 (1983) 183–188)

The authors have asked that the following changes be made to the text:

Page 184, Experimental, line to be added:

All the reactions were carried out in THF.

Page 185, line 5 should read:

at 2010 cm^{-1}) is accompanied by the formation of $\text{Mn}(\text{CO})_5^-$ (IR maximum at 1860

Page 185, line 21 should read:

$\text{Mn}(\text{CO})_5^-$ and 1780 cm^{-1} for $\text{Mn}(\text{CO})_4\text{PR}_3^-$ [5b]. On further decrease in the cone
