

Keywords for 1994

Starting from 1994 the *Journal of Organometallic Chemistry* will publish keywords for all papers just under the Abstract. The keywords will be used as entries for the Subject Index. We believe that printed keywords will give a clear view of whether the article is of interest to the reader. Thus we have drawn up a tentative list of keywords as shown below. Authors who have their article accepted for publication in the *Journal of Organometallic Chemistry* will receive this list of keywords with the proofs of their paper. The authors are then free to indicate new, more appropriate, keywords, as this list should only be regarded as a guideline.
