

# Ag-Sb (Silver-Antimony)

H. Okamoto

[1993Oka] revised the hypo-eutectic section of the Ag-Sb phase diagram in [Massalski2] based on [1992Fes] (solid lines in Fig. 1). The hyper-eutectic section was revised by [2001Has] by using differential scanning calorimetry. The result is shown with dashed lines in Fig. 1.
