

# Y-Zn (Yttrium-Zinc)

H. Okamoto

The Y-Zn phase diagram in [Massalski2] was redrawn from [1976Mas] with a modification from  $\text{YZn}_6$  to  $\text{YZn}_5$ .

Thermodynamic assessment of this system was reported by [2006Sha] and [2006Liu, 2006Wen] independently. The calculated phase diagrams are very similar. The diagram of [2006Wen] is shown in Fig. 1 because the calculated results are reported in more detail.
