J. T. Farrell and C. A. Taatjes: Infrared Frequency-Modulation Probing of Cl + C₃H₄ (Allene, Propyne) Reactions: Kinetics of HCl Production from 292 to 850 K

Page 4846: The estimate of the vibrational branching fraction for the Cl + allene reaction used the published incorrect expression for ϵ . The vibrational fraction should be $f = \text{HCl}(v = 1)/\text{HCl}(\text{total}) = 0.54 \pm 0.15$ instead of 0.42 ± 0.10 .
