

Publications of Charles S. Parmenter

1. Energy Dissipation from Excited Acetaldehyde Molecules. W. A. Noyes, Jr. and C. S. Parmenter. *J. Am. Chem. Soc.*, 85, 416–421, 1964.
2. Primary Photochemical Processes in Glyoxal at 4358 Å. C. S. Parmenter. *J. Chem. Phys.*, 41, 658–665, 1964.
3. Effects of Pressure on Fluorescence and Intersystem Crossing in Benzene Vapor. G. B. Kistiakowsky and C. S. Parmenter. *J. Chem. Phys.*, 42, 2942–2948, 1965.
4. (a) Energy Transfer Between Benzene and Biacetyl and the Lifetime of Triplet Benzene in the Gas Phase. B. L. Ring and C. S. Parmenter. *J. Chem. Phys.*, 46, 1998–1999, 1967. (b) Energy Transfer Between Benzene and Biacetyl and the Lifetime of Triplet Benzene in the Gas Phase. C. S. Parmenter and B. L. Ring. In *The Triplet State*. A. B. Zahlan, Editor. (Cambridge University Press: Cambridge, U.K., 1967), p 431 (Abstract only).
5. High Vacuum Feedthrough for Rotational and Translational Motion. C. S. Parmenter and M. W. Schuyler. *Rev. Sci. Instrum.*, 39, 611, 1968.
6. Fluorescence of Benzene Vapor at Low Pressures. C. S. Parmenter and A. H. White. *J. Chem. Phys.*, 50, 1631–1643, 1969.
7. Fluorescence, Phosphorescence, and Triplet Formation in Biacetyl at Low Pressures. C. S. Parmenter and H. M. Poland. *J. Chem. Phys.*, 51, 1551–1558, 1969.
8. Fluorescence Quenching in Aromatic Hydrocarbons by Oxygen. C. S. Parmenter and J. D. Rau. *J. Chem. Phys.*, 51, 2242–2246, 1969; Erratum, *J. Chem. Phys.*, 52, 1623, 1970.
9. Fluorescence and Nonradiative Transitions from Single Vibrational Levels in the Excited Singlet State of Benzene. C. S. Parmenter and M. W. Schuyler. *Transitions Non Radiat. Mol., Reunion Soc. Chim. Phys.*, 20th, 1969, pp 92–100. (Suppl. *J. Chim. Phys.* 1969–1970).
10. Effect of Phase on the Fluorescence Lifetime and on the Intersystem Crossing Rate in Biacetyl. L. G. Anderson and C. S. Parmenter. *J. Chem. Phys.*, 52, 466–468, 1970.
11. Single Vibronic Level Fluorescence. II. Vapor Phase Fluorescence Spectra from the Zero Point Level of $^1B_{2u}$ Benzene and Benzene- d_6 . C. S. Parmenter and M. W. Schuyler. *J. Chem. Phys.*, 52, 5366–5374, 1970.
12. Single Vibronic Level Fluorescence. III. Fluorescence Yields from Three Vibronic Levels in the $^1B_{2u}$ State of Benzene. C. S. Parmenter and M. W. Schuyler. *Chem. Phys. Lett.*, 6, 339–341, 1970.
13. The Absolute Rates of Radiative and of Nonradiative Decay from Three Vibronic Levels in Isolated $^1B_{2u}$ Benzene Molecules. W. R. Ware (Minnesota), B. K. Selinger (Canberra), C. S. Parmenter, and M. W. Schuyler. *Chem. Phys. Lett.*, 6, 342–344, 1970.
14. Intersystem Crossing in Glyoxal Vapor. An Experimental Study of Both the Resonant and Statistical Limits. L. G. Anderson, C. S. Parmenter, H. M. Poland, and J. D. Rau. *Chem. Phys. Lett.*, 8, 232–234, 1971.
15. The Absorption Spectrum of Benzene Vapor Near 2537 Å. G. H. Atkinson and C. S. Parmenter. *J. Phys. Chem.*, 75, 1564–1572, 1971.
16. Single Vibronic Level Fluorescence. IV. Its Application to the Analysis of Resonance Fluorescence from Benzene Excited by the 2537 Hg Line. G. H. Atkinson, C. S. Parmenter, and M. W. Schuyler. *J. Phys. Chem.*, 75, 1572–1584, 1971.
17. Radiative and Nonradiative Processes in Benzene. C. S. Parmenter. *Adv. Chem. Phys.*, 22, 365–421, 1972.
18. Fluorescence and Intersystem Crossing as a Function of Rotational Energy in the S_1 State of Benzene. M. D. Schuh and C. S. Parmenter. *Chem. Phys. Lett.*, 13, 120–124, 1972.
19. Resonance Fluorescence and Nonradiative Relaxation in Polyatomic Gases. C. S. Parmenter. In *MTA International Review of Science, Spectroscopy*. D. A. Ramsay, Editor. Physical Chemistry Series 1, Vol. 3, pp 297–338, 1972.
20. Single Vibronic Level Fluorescence. G. H. Atkinson, C. S. Parmenter, and M. W. Schuyler. “Creation and Detection of the Excited State”, W. R. Ware, Ed. (Marcel Dekker: New York), Vol. 3, pp 117–126, 1974.
21. Single Vibronic Level Fluorescence V. Pyridazine. A. D. Jordan and C. S. Parmenter. *Chem. Phys. Lett.*, 16, 437–441, 1972.
22. Collision Induced Intersystem Crossing. The Primary Photophysics of Glyoxal Vapor Excited at 4358 Å. L. G. Anderson, H. M. Poland, and C. S. Parmenter. *Chem. Phys.*, 1, 401–417, 1973.
23. 360° Scattering Diagrams from Individual Aerosols in a Flowing Stream. T. R. Marshall, C. S. Parmenter, and M. Seaver. *National Bureau of Standards Special Publication, 412*, Aerosol Measurements. (NBS: Washington, DC, 1974), pp 41–56.
24. On Intensity Perturbations in Vibronically Induced Radiative Transitions. G. Fischer, B. Sharf, and C. S. Parmenter. *Mol. Phys.*, 29, 1063–1072, 1975.
25. An Extended View of the Benzene 260 nm Transition via Single Vibronic Level Fluorescence. I. General Aspects of Benzene SVL Fluorescence. A. E. W. Knight, C. S. Parmenter, and M. W. Schuyler. *J. Am. Chem. Soc.*, 97, 1993–2005, 1975.
26. An Extended View of the Benzene 260 nm Transition via Single Vibronic Level Fluorescence. II. SVL Fluorescence as a Probe in the Assignment of the Absorption Spectrum. A. E. W. Knight, C. S. Parmenter, and M. W. Schuyler. *J. Am. Chem. Soc.*, 97, 2005–2013, 1975.
27. Characterization of Clouds by Rapid Measurement of Light Scattering Patterns from Individual Particles. T. R. Marshall, C. S. Parmenter, and Mark Seaver. *J. Colloid Interface Sci.*, 55, 624–636, 1976.
28. Precision Measurement of Particulates by Light Scattering at Optical Resonance. T. R. Marshall, C. S. Parmenter, and M. Seaver. *Science*, 190, 375–377, 1975.
29. $n\pi^*$ Fluorescence from Selected Vibronic Level of Pyrimidine Vapor: Franck–Condon Factors and Excited-State Anharmonic Coupling. A. E. W. Knight, C. M. Lawburgh, and C. S. Parmenter. *J. Chem. Phys.*, 63, 4336–4351, 1975.

30. Laser Studies of Collision-Induced Radiationless Transitions in Polyatomic Vapors. A. E. W. Knight and C. S. Parmenter. *J. Lumin.*, *12*, 151–158, 1976.
31. Radiative and Nonradiative Processes in the First Excited Singlet State of Azabenzene Vapors. A. E. W. Knight and C. S. Parmenter. *Chem. Phys.*, *15*, 85–102, 1976.
32. Band Intensities in SVL Fluorescence from C₆H₆ Vapor: Franck–Condon Factors, Fermi Resonances, and a Quantitative Test of Herzberg–Teller Theory. C. S. Parmenter, K. Tang, and W. R. Ware. *Chem. Phys.*, *17*, 359–376, 1976.
33. New Measurements of SVL Lifetimes and Quantum Yields in Benzene Vapor: Herzberg–Teller Comparisons of Radiative Transition Probabilities. W. R. Ware, A. M. Garcia, C. S. Parmenter, M. D. Schuh, and K. Tang. *Chem. Phys.*, *17*, 377–390, 1976.
34. Resolved Single Vibronic Level Fluorescence After Two-Photon Excitation of Benzene Vapor: A Direct Confirmation of the Inducing Mode. A. E. W. Knight and C. S. Parmenter. *Chem. Phys. Lett.*, *43*, 399–402, 1976.
35. Electronic Energy Transfer Between Single Vibronic Level of C₆H₆ and C₆D₆ Vapors. C. S. Parmenter, B. Setzer, and K. Tang. *J. Chem. Phys.*, *66*, 1317–1323, 1977.
36. Mode to Mode Vibrational Energy Flow in S₁ Benzene. C. S. Parmenter and K. Tang. *Chem. Phys.*, *27*, 127–150, 1978.
37. Mode-to-Mode Flow of Vibrational Energy Within the S₁ State of Benzene Vapor. C. S. Parmenter and K. Tang. *Am. Chem. Soc. Symp. Ser.*, *56*, 175–178, 1977.
38. Fluorescence from Selected Rotational Levels of S₁ Glyoxal. C. S. Parmenter, and B. F. Rordorf. *Chem. Phys.*, *27*, 1–10, 1978.
39. Rotational Relaxation in S₁ Glyoxal: Cross Sections and a Search for Propensity Rules. B. F. Rordorf, A. E. W. Knight, and C. S. Parmenter. *Chem. Phys.*, *27*, 11–20, 1978.
40. S₁ → S₀ Fluorescence After Narrow Band Excitation of Glyoxal: Single Rotational Level Fluorescence and a Technique for Deconvolution of Doppler Congested Absorptions. B. F. Rordorf and C. S. Parmenter. *J. Mol. Spectrosc.*, *69*, 365–372, 1978.
41. The 260 nm Absorption Spectrum of Benzene I: Remeasured Band Positions and Refined Assignments. G. H. Atkinson and C. S. Parmenter. *J. Mol. Spectrosc.*, *73*, 20–30, 1978.
42. The 260 nm Absorption Spectrum of Benzene II: Selection Rules and Band Contours of Vibrational. Angular Momentum Components. G. H. Atkinson and C. S. Parmenter. *J. Mol. Spectrosc.*, *73*, 31–51, 1978.
43. The 260 nm Absorption Spectrum of Benzene III: Vibronic Analysis. G. H. Atkinson and C. S. Parmenter. *J. Mol. Spectrosc.*, *73*, 52–95, 1978.
44. Rotational Relaxation within the ¹B_{2u} (S₁) State of Benzene. R. A. Coveleskie and C. S. Parmenter. *J. Chem. Phys.*, *69*, 1044–1054, 1978.
45. Polystyrene Latex Particle Size Distribution by Electron Microscopy and Light Scattering. R. L. Rowell, R. S. Farinato, J. W. Parsons, K. H. Langley, J. R. Stone, T. R. Marshall, C. S. Parmenter, M. Seaver, and E. B. Bradford. *J. Colloid Interface Sci.*, *69*, 590–595, 1979.
46. Mode-to-Mode Vibrational Energy Flow in S₁ Benzene. V–V Resonant Energy Transfer, Microscopic Reversibility and the Role of Level Degeneracies. G. H. Atkinson, C. S. Parmenter, and K. Tang. *J. Chem. Phys.*, *71*, 68–72, 1979.
47. The Role of Intermolecular Potential Well Depths in Collision-Induced State Changes. H. M. Lin, M. Seaver, K. Tang, A. E. W. Knight, and C. S. Parmenter. *J. Chem. Phys.*, *70*, 5442–5457, 1979.
48. A Method to Estimate Intermolecular Potential Well Depths for Species in Both Ground and Excited Electronic States. C. S. Parmenter, and M. Seaver. *J. Chem. Phys.*, *70*, 5458–5462, 1979.
49. Laser Excited Fluorescence from s-Triazine Vapour: An Analysis of Vibronic Coupling Pathways. A. E. W. Knight and C. S. Parmenter. *Chem. Phys.*, *43*, 257–270, 1979.
50. The Temperature Dependence of Collision-Induced State Changes. C. S. Parmenter, and M. Seaver. *Chem. Phys. Lett.*, *67*, 279–283, 1979.
51. A Direct View of Intramolecular Vibrational Redistribution in S₁ p-Difluorobenzene. R. A. Coveleskie, D. A. Dolson, and C. S. Parmenter. *J. Chem. Phys.*, *72*, 5774–75, 1980.
52. Single Vibronic Level Fluorescence Spectra from the S₁ (¹B_{2u}) State of p-Difluorobenzene Vapor. R. A. Coveleskie and C. S. Parmenter. *J. Mol. Spectrosc.*, *86*, 86–114, 1981.
53. An Observation of Collision-Free Intramolecular Vibrational Redistribution in S₁ p-Fluorotoluene. D. A. Dolson, C. S. Parmenter, and B. M. Stone. *Proceedings of the NATO Advanced Study Institute "Fast Reactions in Energetic Systems"*. (Reidel: Amsterdam, 1981), 433–443.
54. Predissociation in the S₁ Zero-Point Level of Glyoxal Vapor. A Query. G. W. Loge, C. S. Parmenter, and B. F. Rordorf. *Chem. Phys. Lett.*, *74*, 309–313, 1980.
55. Polarization Effects on Rotational Line Strengths in Collision-Free Polyatomic Fluorescence Spectra. G. W. Loge and C. S. Parmenter. *J. Chem. Phys.*, *74*, 29–35, 1981.
56. The Temperature Dependence of Collision-Induced Intersystem Crossing in S₁ Glyoxal Vapor. C. S. Parmenter and M. Seaver. *Chem. Phys.*, *53*, 333–344, 1980.
57. Collision-free Dissociation after Excitation of Single Rotational Levels in S₁ Glyoxal. Gary Loge and C. S. Parmenter. *J. Phys. Chem.*, *85*, 1653–1662, 1981.
58. Intramolecular Vibrational Redistribution in the S₁ State of p-Fluorotoluene. D. A. Dolson, C. S. Parmenter, and B. M. Stone. *Chem. Phys. Lett.*, *81*, 360–364, 1981.
59. Vibrational Energy Flow Within Excited Electronic States of Large Molecules. C. S. Parmenter. *J. Phys. Chem.*, *86*, 1735–1750, 1982. An Invited Feature Article.
60. Picosecond Studies of Intramolecular Vibrational Relaxation in S₁ p-Difluorobenzene Vapor. R. A. Coveleskie, D. A. Dolson, C. S. Parmenter, and B. M. Stone. *Springer Ser. Chem. Phys.*, *23* (Picosecond Phenomena), 190–191, 1982.
61. The Collisional Flow of Vibrational Energy into Surrounding Vibrational Fields Within S₁ Benzene. K. Y. Tang and C. S. Parmenter. *J. Chem. Phys.*, *78*, 3922–3934, 1983.

62. The Correspondence Between Rotational Relaxation and Collision-Induced Intersystem Crossing in S_1 Pyrimidine. A. E. W. Knight, J. T. Jones, and C. S. Parmenter. *J. Phys. Chem.*, *87*, 973–983, 1983.
63. Vibrational Relaxation Within Mixed Electronic States. A. E. W. Knight and C. S. Parmenter. *J. Phys. Chem.*, *87*, 417–424, 1983.
64. Intramolecular Vibrational Redistribution at Low State Densities in S_1 Aromatics. Evidence for Rotational Contributions. D. A. Dolson, K. W. Holtzclaw, S. H. Lee, S. Munchak, C. S. Parmenter, B. M. Stone, and A. E. W. Knight. *Laser Chem.*, *2*, 271–283, 1983.
65. Collision-Induced $S_1 \rightarrow T$ Crossing in Glyoxal. Saturation and Transformation to the Statistical Limit. K. W. Holtzclaw, D. B. Moss, C. S. Parmenter, and G. W. Loge. *J. Phys. Chem.*, *87*, 4495–4503, 1983.
66. Vibrational Numbering of Bands in the Spectra of Polyatomic Molecules (a short comment). J. C. D. Brand, H. J. Callomon, K. K. Innes, J. Jortner, S. Leach, D. H. Levy, A. J. Merer, I. M. Mills, C. B. Moore, C. S. Parmenter, D. A. Ramsay, K. Narahari Rao, E. W. Schlag, J. K. G. Watson, and R. N. Zare. *J. Phys. Chem.*, *87*, 2636, 1983; *J. Mol. Spectrosc.*, *99*, 482–483, 1983; *J. Photochem.*, *22*, 295–6, 1983.
67. Vibrational Redistribution Within Excited Electronic States of Polyatomic Molecules. C. S. Parmenter. (The Spiers Memorial Introductory Lecture), *Faraday Discuss. Chem. Soc.*, *75*, 7–22, 1983.
68. Intramolecular Vibrational Redistribution at Low State Densities in S_1 Aromatics. R. A. Coveleskie, D. A. Dolson, K. W. Holtzclaw, S. H. Lee, C. S. Parmenter, and B. M. Stone. *Proceedings of the U. S.–Australia Workshop on Reactivity and Energy Redistribution in Surface Active Free Radicals* (U. S.–Australia Cooperative Science Program). March 1983, pp 51–63.
69. A Time-Resolved Search for IVR in S_1 p-Difluorobenzene Vapor. K. W. Holtzclaw and C. S. Parmenter. *J. Phys. Chem.*, *88*, 3182–3185, 1984.
70. Chemical Timing I. A Method of Picosecond Fluorescence Spectroscopy for the Study of Intramolecular Vibrational Redistribution. R. A. Coveleskie, D. A. Dolson, and C. S. Parmenter. *J. Phys. Chem.*, *89*, 645–654, 1985.
71. Chemical Timing II. The Picosecond Dynamics of Intramolecular Vibrational Redistribution in S_1 p-Difluorobenzene. R. A. Coveleskie, D. A. Dolson, and C. S. Parmenter. *J. Phys. Chem.*, *89*, 655–665, 1985.
72. Timing Gases for Picosecond Chemical Timing of Molecular Fluorescence Spectra. R. A. Coveleskie, D. A. Dolson, D. B. Moss, S. C. Munchak, and C. S. Parmenter. *Chem. Phys.*, *96*, 191–198, 1985.
73. An Accelerating Mode for Intramolecular Vibrational Redistribution. K. W. Holtzclaw and C. S. Parmenter. *J. Chem. Phys.*, *82*, 5283–5284, 1985.
74. An Active Mode in Both the Collision-free and Collision-Induced Vibrational Dynamics of S_1 p-Difluorobenzene. D. L. Catlett, Jr., K. W. Holtzclaw, D. Krajnovich, D. B. Moss, C. S. Parmenter, W. D. Lawrance, and A. E. W. Knight. *J. Phys. Chem.*, *89*, 1577–1581, 1985.
75. Chemical Timing III. The Picosecond Dynamics of Intramolecular Vibrational Redistribution from Eleven S_1 Levels in p-Difluorobenzene. K. W. Holtzclaw and C. S. Parmenter. *J. Chem. Phys.*, *84*, 1099–1118, 1986.
76. Chemical Timing IV. The Ro-Vibronic Level Structure Associated with Intramolecular Vibrational Redistribution S_1 p-Difluorobenzene. D. A. Dolson, K. W. Holtzclaw, D. B. Moss and C. S. Parmenter. *J. Chem. Phys.*, *84*, 1119–1132, 1986.
77. A Time-Resolved Fluorescence Observation of IVR within the Channel Three Region of S_1 Benzene. D. B. Moss and C. S. Parmenter. *J. Phys. Chem.*, *90*, 1011–1014, 1986.
78. The Methyl Rotor as an Accelerating Functional Group for IVR. C. S. Parmenter and B. M. Stone. *J. Chem. Phys.*, *84*, 4710–4711, 1986.
79. Mode Selectivity in Vibrational Predissociation: The p-Difluorobenzene–Ar Complex. K. W. Butz, D. L. Catlett, Jr., G. E. Ewing, D. Krajnovich, and C. S. Parmenter. *J. Phys. Chem.*, *90*, 3522–3541, 1986.
80. State-to-State Vibrational Transfer in Atom-Molecule Collision. Beams vs Bulbs. D. Krajnovich, D. L. Catlett, Jr., and C. S. Parmenter. *Chem. Rev.*, *87*, 237–288, 1987.
81. On Contributions of van der Waals Interactions to Vibrational Level Mixing. Torsion–Vibration Coupling in p-Fluorotoluene. D. B. Moss, C. S. Parmenter and G. E. Ewing. *J. Chem. Phys.*, *86*, 51–61, 1987.
82. van der Waals Coupling Between Internal Rotation and Molecular Vibrations. The Methyl Rotor Effect on IVR. G. E. Ewing, R. J. Longfellow, D. B. Moss, and C. S. Parmenter. NATO ASI Series, Vol. 200, “Stochasticity and Intramolecular Redistribution of Energy”, R. Lefebvre and S. Mukamel, Editors. (D. Reidel Pub. Co.: Dordrecht, The Netherlands, 1987), pp 163–169.
83. Cis-Glyoxal in Effusive and Supersonic Beams. Spectroscopy, Selective Pumping and Cis–Trans Interconversion. K. W. Butz, J. J. Johnson, D. J. Krajnovich and C. S. Parmenter. *J. Chem. Phys.*, *86*, 5923–5939, 1987.
84. Laser Probes of Intramolecular Energy Transfer Between Internal Rotation and Vibrations in Large Polyatomics. R. J. Longfellow and C. S. Parmenter. *Hyperfine Interact.*, *38*, 625–632, 1987.
85. A Crossed Beam Study of the Competition Between Rotational and Vibrational Energy Transfer in $H_2 +$ Glyoxal (S_1) Collisions. K. W. Butz, H. Du, D. J. Krajnovich, and C. S. Parmenter. *J. Chem. Phys.*, *87*, 3699–3700, 1987.
86. How a (Nearly) Free Rotor Accelerates Intramolecular Vibration Relaxation. Theory and Experiment. R. J. Longfellow and C. S. Parmenter. *J. Chem. Soc., Faraday Trans. 2*, *84*, 1499–1510, 1988.
87. A Tour of Vibrational Predissociation from Seven Levels in the S_1 p-Difluorobenzene–Ar van der Waals Complex. H.-K. O, C. S. Parmenter, and M.-C. Su. *Ber. Bunsen-Ges. Phys. Chem.*, *92*, 253–258, 1988.
88. Large $\Delta v'$ Transitions and Isotope Effects in the Crossed Beams Inelastic Scattering of I_2^* ($v' = 35$) from H_2 and D_2 . D. J. Krajnovich, K. W. Butz, H. Du, and C. S. Parmenter. *J. Phys. Chem.*, *92*, 1388–1392, 1988.
89. Rovibrational Level Mixing Below and Within the Channel Three Region of S_1 Benzene. R. J. Longfellow, D. B. Moss, and C. S. Parmenter. *J. Phys. Chem.*, *92*, 5438–5449, 1988.
90. Rovibrational Energy Transfer from the ($0^0, K' = 0$) and ($7^2, K' = 0$) Levels of S_1 Glyoxal in Crossed Beam Collisions with H_2 . K. W. Butz, H. Du, D. J. Krajnovich, and C. S. Parmenter. *J. Chem. Phys.*, *89*, 4680–4691, 1988.

91. A New Crossed Beam Approach to Vibrationally Inelastic Scattering in Neutral Collision Systems. State-to-State Cross Sections for He + I₂* ($v' = 15, 25, 35$) at E_{c.m.} = 89 meV. D. J. Krajnovich, K. W. Butz, H. Du, and C. S. Parmenter. *J. Chem. Phys.*, *92*, 7705–7724, 1989.
92. Vibrationally (and Rotationally) Inelastic Scattering Characteristics for the He + I₂* System. D. J. Krajnovich, K. W. Butz, H. Du, and C. S. Parmenter. *J. Chem. Phys.*, *92*, 7725–7739, 1989.
- 92a. Preface to “Mode Selectivity in Unimolecular Reactions”. J. Manz and C. S. Parmenter. *Chem. Phys.*, *139* (preface to volume), 1989.
93. An Experimental Potential Energy Surface for Internal Rotation in Glyoxal. K. W. Butz, D. J. Krajnovich and C. S. Parmenter. *J. Chem. Phys.*, *93*, 1557–1567, 1990.
94. State-Resolved Vibrational Energy Transfer Channels from S₁ 0⁰ p-Difluorobenzene in Collision with He and Ar. D. L. Catlett, Jr. and C. S. Parmenter. *J. Phys. Chem.*, *95*, 2864–2876, 1991.
95. An Experimental Exploration of the Energy Gap Law for Vibration–Translation Energy Transfer. The I₂* + M System. H. Du, D. J. Krajnovich and C. S. Parmenter. *J. Phys. Chem.* *95*, 2104–2107, 1991.
96. A Fluorescence Characterization of the p-Difluorobenzene–Argon van der Waals Complex. Energy Levels, Geometries and Dissociation Energies. M.-C. Su, H.-K. O, and C. S. Parmenter. *Chem. Phys.*, *156*, 261–280, 1991.
97. Observations of the Level Mixing Associated with the Methyl Rotor Acceleration of Intramolecular Vibrational Redistribution. Z.-Q. Zhao and C. S. Parmenter. In *Proceedings of the 24th Jerusalem Conference in Quantum Chemistry and Biochemistry*. B. Pullman and J. Jortner, Editors. (Kluwer Academic Publishers: Dordrecht, The Netherlands, 1991), pp 127–137.
98. The Influence of a Nearly Free Methyl Rotor on the Dynamics of Vibrational Predissociation and IVR. Z.-Q. Zhao and C. S. Parmenter. In *Time-Resolved Vibrational Spectroscopy*. H. Takahashi, Editor. (Springer-Verlag Co.: Heidelberg, Germany, 1992), pp 227–230.
99. Measurement and Conjecture Concerning IVR Acceleration by a Methyl Group. CH₃ vs CD₃. D. B. Moss, C. S. Parmenter, T. A. Peterson, C. J. Pursell, and Z.-Q. Zhao. Inst. Phys. Conf. Ser. No. 126. In *Ultrafast Processes in Spectroscopy*, 1991. A. Lauberau and A. Seilmeir, Editors. (IOP Publishing Ltd.: Bristol, U.K., 1992), pp 465–470.
100. p-Fluorotoluene 1. Methyl (CH₃ and CD₃) Internal Rotation in the S₁ and S₀ States. Z. Q. Zhao, C. S. Parmenter, D. B. Moss, A. J. Bradley, A. E. W. Knight, and K. G. Owens. *J. Chem. Phys.*, *96*, 6362–6377, 1992.
101. Harmonic Mode Scrambling in p-Difluorobenzene. E. R. Davidson, H. J. Elston and C. S. Parmenter. *Chem. Phys. Lett.*, *197*, 123–130, 1992.
102. Acceleration of Intramolecular Vibrational Redistribution by Methyl Internal Rotation. A Chemical Timing Study of p-Fluorotoluene and p-Fluorotoluene-d₃. D. B. Moss and C. S. Parmenter. *J. Chem. Phys.*, *98*, 6897–6905, 1993.
103. Vibrational Energy Transfer in S₁ p-Difluorobenzene. A Comparison of Low and Room-Temperature Collisions. C. J. Pursell and C. S. Parmenter. *J. Phys. Chem.*, *97*, 1615–1621, 1993.
104. The Vibrations of S₁ (¹B_{2u}) p-Difluorobenzene-d₄. The S₁–S₀ Fluorescence Spectroscopy and Ab Initio Calculations. H. J. Elston, E. R. Davidson, F. G. Todd and C. S. Parmenter. *J. Phys. Chem.*, *97*, 5506–5518, 1993.
105. State-to-State Collisional Vibrational Energy Transfer in S₁ p-Difluorobenzene. D. L. Catlett, Jr., C. S. Parmenter, and C. J. Pursell. *J. Phys. Chem.*, *98*, 3263–3269, 1994.
106. Influences of Internal Rotation on Vibrational Predissociation Dynamics. H. J. Elston, B. D. Gilbert, C. S. Parmenter, H.-K. O, T. A. Stone, M.-C. Su and Z.-Q. Zhao. *Proceedings of the 6th International Conference on Time-Resolved Vibrational Spectroscopy*; A. Lau, Editor, (Springer-Verlag: Heidelberg, Germany, 1993) pp 14–17.
107. Acceleration of Intramolecular Vibrational Redistribution by Methyl Internal Rotation. II. A Comparison of m-Fluorotoluene and p-Fluorotoluene. P. J. Timbers, C. S. Parmenter and D. B. Moss. *J. Chem. Phys.*, *100*, 1028–1034, 1994.
108. Influences of Internal Rotation on the Dissociation of van der Waals Complexes. C. S. Parmenter, B. D. Gilbert, H.-K. Oh, M.-C. Su, and Z.-Q. Zhao. *Lietuvos Fizikos Žurnalas (Lithuanian J. Phys.)*, *34*, 114–117, 1994.
109. Crossed Beam Rovibrational Energy Transfer from S₁ Glyoxal. 2. Uniform Scattering Characteristics from the Initial Levels 0⁰, 5¹ and 8¹. B. D. Gilbert, C. S. Parmenter, and D. J. Krajnovich. *J. Phys. Chem.*, *98*, 7116–7122, 1994.
110. Crossed Beam Rovibrational Energy Transfer from S₁ Glyoxal. 3. Quantitative H₂ and He Cross Sections for (0⁰ K' = 0) and (7² K' = 0) and Comparison with Theory. B. D. Gilbert, C. S. Parmenter, and D. J. Krajnovich. *J. Chem. Phys.*, *101*, 7423–7439, 1994.
111. Crossed Beam Rovibrational Energy Transfer from S₁ Glyoxal. 4. Reduced Mass Effects and An Overview of the Inelastic Scattering Characteristics from Four Initial Levels. B. D. Gilbert, C. S. Parmenter, and D. J. Krajnovich. *J. Chem. Phys.*, *101*, 7440–7450, 1994.
112. Vibrational Predissociation Dynamics and Internal Rotation in Aromatic van der Waals Complexes. B. D. Gilbert, C. S. Parmenter, M.-C. Su, H.-K. Oh, and Z.-Q. Zhao. *Appl. Phys. B*, *59*, 397–402, 1994.
113. The Collisional Flow of Vibrational Energy into Surrounding Vibrational Fields Within S₁ p-Difluorobenzene. Rate Constants for Initial Levels with High Vibrational Excitation. D. L. Catlett, Jr., C. S. Parmenter, and C. J. Pursell. *J. Phys. Chem.*, *99*, 7371–7380, 1995.
114. Vibrational Predissociation Dynamics of p-Difluorobenzene-N₂ Complexes. Comparison with p-Difluorobenzene-Ar. B. D. Gilbert, C. S. Parmenter, and H.-K. Oh. *J. Phys. Chem.*, *99*, 2444–2458, 1995.
115. Participation of Methyl Internal Rotation in the Vibrational Predissociation of the Aromatic van der Waals Complex p-Fluorotoluene–Ar. Z.-Q. Zhao and C. S. Parmenter. *Ber. Bunsen-Ges. Phys. Chem.*, *99*, 536–543, 1995.
116. Unusual Vibrational Predissociation Dynamics of Aromatic Clusters with Internal Rotation. C. S. Parmenter and Z.-Q. Zhao. *SPIE Proc.*, *2548*, 175–181, 1995.
117. Vibrational Energy Transfer. G. W. Flynn, C. S. Parmenter, and A. M. Wodtke. *J. Phys. Chem.*, *100*, 12817–12838, 1996.

118. Crossed Molecular Beam Observations of Vibrational Energy Transfer in Only Moderately Excited Glyoxal Molecules. S. M. Clegg, B. D. Gilbert, S.-P. Lu, and C. S. Parmenter. *Am. Chem. Soc. Symp. Ser.*, 678, 237–250, 1997.
119. Factors Controlling the Competition Among Rotational and Vibrational Energy Transfer Channels in Glyoxal. C. S. Parmenter, S. M. Clegg, D. J. Krajnovich, and S.-P. Lu. *Proc. Natl. Acad. Sci. U.S.A.*, 94, 8387–8392, 1997.
120. The Relative Influences of Ring Modes and Methyl Internal Rotation on the Cold Beam IVR of p-Fluorotoluene. Q. Ju, C. S. Parmenter, T. A. Stone, and Z.-Q. Zhao. *Isr. J. Chem.*, 37, 379–385, 1997.
121. Aligning Symmetric and Asymmetric Top Molecules via Single Photon Excitation. M. J. Weida and C. S. Parmenter. *J. Chem. Phys.*, 107, 7138–7147, 1997.
122. Practical Aspects of Aligning Asymmetric Top Molecules via Single Photon Excitation: An Application to S_1 \rightarrow S_0 Excitation of Glyoxal. M. J. Wieda and C. S. Parmenter. *J. Phys. Chem. A*, 101, 9594–9602, 1997.
123. Scaled Quantum Mechanical Study of Vibrational Force Field for p-Difluorobenzene and p-Fluorotoluene. A. A. Jarzecki, E. R. Davidson, Q. Ju, and C. S. Parmenter. *Int. J. Quantum Chem.*, 72, 249–260, 1999.
124. State-to-State Inelastic Scattering from S_1 Glyoxal with the Rare Gas Series: Uniform Rotational vs Changing Vibrational Channel Competition. S. M. Clegg, A. B. Burrill, and C. S. Parmenter. *J. Phys. Chem. A*, 102, 8477–8485, 1998.
125. Observations of a Quantum Symmetry Restriction in the Rovibrationally Inelastic Scattering of Glyoxal. S. M. Clegg and C. S. Parmenter. *J. Phys. Chem. A*, 104, 10265–10270, 2000.
126. Absolute Rate Constants for Collisional Vibrational Relaxation in Dense Vibrational Regions of S_1 p-Difluorobenzene. T. A. Stone and C. S. Parmenter. *J. Phys. Chem. A*, 106, 938–944, 2002.
127. Non-Stern–Volmer Quenching of S_1 pDFB Fluorescence by O_2 and the Charge-Transfer Complex. U. S. Tasic, E. R. Davidson, and C. S. Parmenter. *J. Phys. Chem. A*, 107, 3552–3558, 2003.
