

ERRATUM

Volume 90, Number 1 (1991), in the Letter to the Editor "Simple and Perovskite Oxides of Transition-Metals: Why Some Are Metallic, While Most Are Insulating," by Jerry B. Torrance, Philippe Lacorro, Chinnarong Asavaroengchai, and Robert M. Metzger, pages 168–172, two printing errors occurred:

The second author's name was spelled incorrectly. It should read Philippe Lacorre.

The vertical line in figure 2 did not appear. For the reader's convenience, the figure is reproduced below.

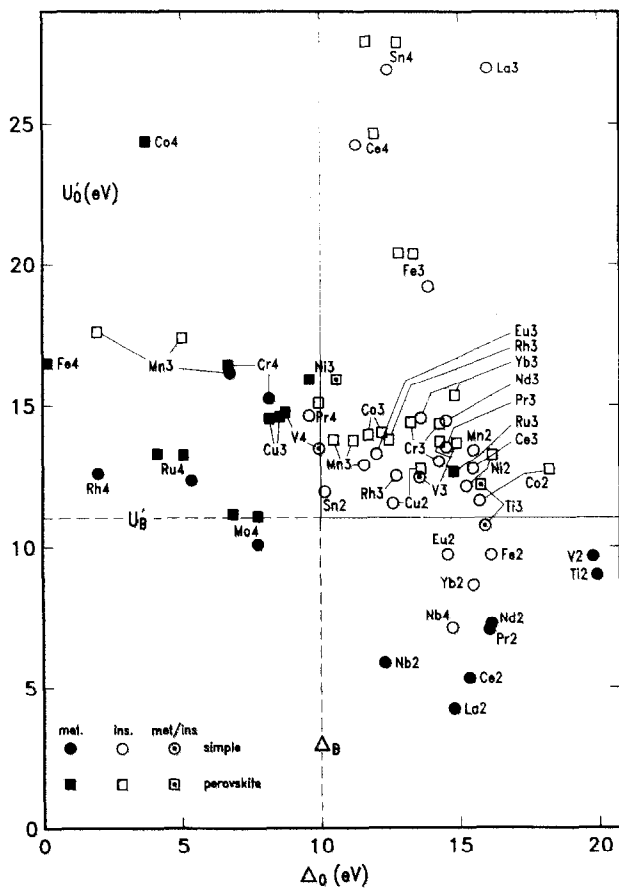

FIG. 2. A plot of the calculated values of U_0 and Δ_0 for the 76 oxides in Table I. The lines attempt to separate the "insulators" (open symbols) from the "metals" (solid symbols) according to the ZSA framework.
