

a variational approach. As shown in Figure 1 of the present discussion the values obtained in reference [1] agree admirably well with those determined in reference [3] indicating extremely high accuracy of the approach developed in reference [1].

ACKNOWLEDGMENT

The present study has been sponsored by Secretaría General de Ciencia y Tecnología of Universidad Nacional del Sur and by CONICET. Miss C. Pistonesi has been supported with a CONICET Fellowship.

We thank Professor Laura and his co-authors for the useful comments that they made in their Letter to the Editor [1]. Their additional results provide a useful validation of results published in reference [2].
